

INTERVENTION TO MR. BOLA'S APPLICATION 2011-1271-3

The interveners all have proved the need for a radio station in Markham but have not proven the need for a Hybrid English/ethnic service. To the contrary, many interveners have proven that an ethnic predominantly South-Asian station is needed in Markham.

Mr. Bola's high projections are more than questionable. Mr. Bola's ethnic programming will be all brokered. Mr. Kumar proposes to be 100% locally produced by the station.

Even Mr. Bola recognizes that the Markham station should be multicultural. Why relinquish the multicultural programming to evenings and week-ends?

As well as many interveners, the Commission is also concerned with Mr. Bola's category B or category two licenses. Why 28 licenses?

Given Mr. Bola's answers, one could understand one or two but 28 questions? "Does Mr. Bola have the means to put his station on the air and maintain it on the air? "Answers: " Mr. Kumar does the proof is the S.C.M.O.!"

As for Mr. Bola's proposal of using a FM frequency that would jeopardize the future of CJVF-FM being low power, until such time somebody come up with an engineering brief found technically acceptable by Industry Canada that would duplicate the existing coverage of CJVF-FM. Our statement is that there is no frequencies available to replace 105.9 mhz for CJVF. The Commission issued a valid license to CJVF, valid until August 31st, 2018 - CRTC decision 2011-756 - CJVF is committed to contribute \$17,000 do C.C.D. for the first period of its license (7 years).

The Commission will note that we have the support of the community.

INTERVENTION TO THE BRAMPTON APPLICATION 2011-1623-6 - MR. SARABJEST S. ARORA

- 1) There is at least another AM daytime frequency that could be used by this applicant and free 1190 to be used from our Markham site.
- 2) Given other interventions, does Brampton need this new station?
- 3) CRTC's public notice 2000-13 - January 28th, 2000, page 5, paragraph 21 states that a community radio station is owned and controlled by a not-for-profit organization, the structure of which provides for membership, management, operation and programming, primarily by members of the community at large.

This definitely appears not be the case in application 2011-1623-6!
