## Profiles 2010-Chronic Disease Prevention

## New Jersey Secondary Schools

The School Health Profiles (Profiles) is a system of surveys assessing school health policies and practices in states, territories, and large urban school districts. Profiles surveys are conducted biennially among representative samples of middle and high school principals and lead health education teachers.

| Physical Education and Physical Activity | Among States* |  | New Jersey $\% \quad \mathrm{Cl}^{\dagger}$ |
| :---: | :---: | :---: | :---: |
|  | Median | Range |  |
| Percentage of schools in which students could not be exempted from taking required physical education for enrollment in other courses, high physical fitness competency test score, and participation in school or community sports, other school activities, vocational training, or community service activities | 65.4 | (14.9-89.3) | 88.2 (84.5-91.0) |
| Percentage of schools that taught 12 key physical activity topics in a required course | 56.6 | (39.0-75.2) | 61.1 (56.2-65.8) |
| Percentage of schools that taught about developing an individualized physical activity plan in a required course | 77.1 | (49.7-87.1) | 77.6 (73.3-81.3) |
| Percentage of schools in which those who teach physical education were provided with key materials for teaching physical education | 71.6 | (39.1-93.9) | 85.3 (81.5-88.5) |
| Percentage of schools that offered opportunities for all students to participate in intramural activities or physical activity clubs | 62.8 | (40.6-87.1) | 78.7 (74.7-82.1) |
| Percentage of schools in which children or adolescents use the school's indoor physical activity or athletic facilities for community-sponsored physical activity classes or lessons | 81.3 | (54.8-96.8) | 90.1 (86.8-92.7) |
| Percentage of schools that provided parents and families with health information to increase parent and family knowledge of physical activity | 44.5 | (31.5-60.6) | 47.9 (43.2-52.7) |
| Nutrition |  |  |  |
| Percentage of schools that did not sell less nutritious foods and beverages (baked goods that are not low in fat, salty snacks that are not low in fat, candy, soda pop or fruit drinks that are not $100 \%$ juice, and sports drinks) anywhere outside the school food service program | 38.4 | (8.3-81.6) | 47.3 (43.0-51.6) |
| Percentage of schools that did not sell soda pop or fruit drinks that are not $100 \%$ juice in vending machines or at the school store, canteen, or snack bar | 70.2 | (45.7-97.1) | 84.5 (80.6-87.7) |
| Percentage of schools that did not sell sports drinks in vending machines or at the school store, canteen, or snack bar | 49.3 | (27.0-91.6) | 59.5 (55.0-63.8) |
| Percentage of schools that always offered fruits or non-fried vegetables in vending machines and school stores, canteens, or snack bars, and during celebrations when foods and beverages are offered | 9.9 | (1.4-23.4) | 16.0 (12.8-19.7) |
| Percentage of schools that prohibited all forms of advertising and promotion of candy, fast food restaurants, or soft drinks in all locations | 49.1 | (32.1-73.0) | 71.6 (67.0-75.7) |
| Percentage of schools that used at least 3 different strategies to promote healthy eating | 21.0 | (8.6-50.2) | 34.6 (30.4-39.2) |
| Percentage of schools that taught 14 key nutrition and dietary behavior topics in a required health education course | 65.5 | (40.5-88.4) | 74.2 (69.6-78.2) |
| Percentage of schools in which the lead health education teacher received professional development during the 2 years before the survey on nutrition and dietary behavior | 40.5 | (21.0-59.0) | 40.9 (36.1-45.8) |

II In school buildings; on school grounds, including on the outside of the school building, on playing fields, or other areas of the campus; on school buses or other vehicles used to transport students; and in school publications.

* Among the 47 (for teacher survey) or 49 (for principal survey) participating states with weighted survey results.
$\dagger$ 95\% confidence interval.
