Oxford Handbooks Online in Psychology

www.oxfordhandbooks.com

Scholarly Research Reviews

Oxford Handbooks Online in Psychology brings together the world's leading scholars to write review essays that evaluate the current thinking on a field or topic, and make an original argument about the future direction of the debate.

Revolutionary changes to the publishing program means that all *Oxford Handbooks Online* in Psychology, are available online as well as in print. Monthly updates introduce articles in advance of print publication and online-only content ensures the most current, authoritative coverage anywhere.

Oxford Research Encyclopedia of Psychology

www.oxfordre.com/psychology

Reference Reimagined

The Oxford Research Encyclopedia of Psychology is part of a major initiative from Oxford University Press to transform its approach to reference publishing in order to better serve the changing needs of university-level digital research.

Through the *Oxford Research Encyclopedia* (ORE) program, Oxford is building dynamic online encyclopedias in 20+ disciplines that will be continuously updated by the world's leading scholars, scientists, and researchers.

The Oxford Research Encyclopedia of Psychology is overseen by Oliver Braddick, Emeritus Professor of Psychology at the University of Oxford, and an editorial board of subject experts, ensuring a comprehensive, encyclopedic map of the field.

The *ORE of Psychology* is currently available via subscription as scholarly articles are gradually added to the site.

VERY SHORT INTRODUCTIONS

Depression

A Very Short Introduction

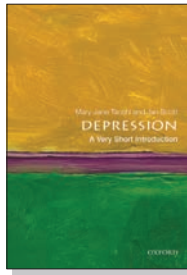

Mary Jane Tacchi,
Consultant Psychiatrist,
and **Jan Scott**,
Newcastle University

What is depression? What is bipolar disorder? How are they diagnosed and how are they treated? This *Very Short Introduction* gives a history of these two disorders and considers how they are experienced and understood today. Scott and Tacchi also discuss how mood disorders can influence creativity.

Very Short Introductions

UK: Jan 2017 / US: Mar 2017

978-0-19-955865-0 | PB | 152pp £8.99/\$11.95
Available as an Ebook | Available in Very Short Introductions online

Clinical Psychology

A Very Short Introduction

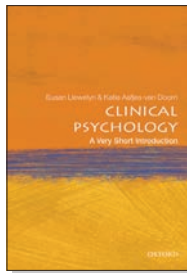

Susan Llewelyn,
University of Oxford,
and **Katie Aafjes-van Doorn**,
Postdoctoral Fellow, Access Institute
for Psychological Services

Clinical psychology treats people who are facing difficulties or changes in their lives. Approaching personal distress as an unhappy outcome of certain ways of thinking, behaving and relating, often occurring within difficult circumstances, practitioners work with people to try and help them change what is distressing or concerning them.

Very Short Introductions

Psychopathy

A Very Short Introduction

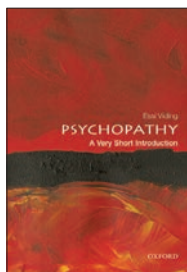

Essi Viding,
University College
London

Despite the fascination with psychopaths in film, TV, and novels, psychopathy remains widely misunderstood. Most psychopaths are not murderers; most violent criminals are not psychopaths. Separating myth from fact, Essi Viding explores how we identify psychopaths, why they behave and develop the way they do, and whether treatment is possible.

TREATMENTS THAT WORK

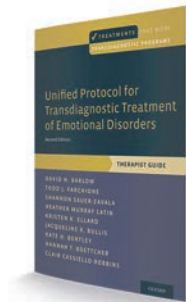

NEW EDITION

Unified Protocol for Transdiagnostic Treatment of Emotional Disorders

Therapist Guide/ Workbook

SECOND EDITION

David H. Barlow, Todd J. Farchione, Shannon Sauer-Zavala, and **Heather Murray Latin**, all at Boston University, **Kristen K. Ellard**, Massachusetts General Hospital, **Jacqueline R. Bullis**, Harvard Medical School, **Kate H. Bentley**, Massachusetts General Hospital/Harvard Medical School, **Hannah T. Boettcher**, VA Medical Center, and **Clair Cassiello-Robbins**, Boston University

- A ground-breaking and radical departure from disorder-specific treatment of emotional disorders
- Provides detailed instructions for conducting each session, session outlines, and recommended homework assignments for patients
- User-friendly topics and advice, applicable to a range of emotional disorders

Unified Protocol for Transdiagnostic Treatment of Emotional Disorders provides an alternative to disorder-specific treatments of various emotional disorders, designed to be applicable to the wide range of anxiety and other disorders with strong emotional components.

The Power of Positive Parenting

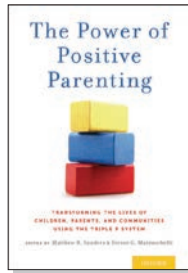

Transforming the Lives of Children, Parents, and Communities Using the Triple P System

Edited by **Matthew R. Sanders**, University of Queensland, and **Trevor G. Mazzucchelli**, Curtin University

The Power of Positive Parenting provides an in-depth description of "Triple P", one of the most extensively studied parenting programs in the world, backed by more than 30 years of ongoing research. Triple P has its origins in social learning theory and the principles of behavior, cognitive, and affective change, and its aim is to prevent severe behavioral, emotional, and developmental problems in children and adolescents by enhancing the knowledge, skills, and confidence of parents.

Caring for Autism

Practical Advice from a Parent and Physician

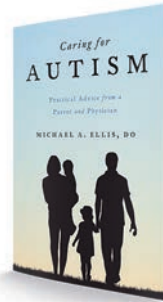

Michael A. Ellis, DO, St Francis Hospital

- Written from the unique perspective of a psychiatrist who specializes in Autism Spectrum Disorder (ASD) and father of a child with ASD
- Discusses the effect of ASD on the whole family, not just the patient involved, and the grieving process that comes with it
- Covers diagnosis, medications, treatments, lifestyle, the educational system and legal issues surrounding ASD, including guardianship

As the father of a daughter with ASD and as a trained psychiatrist who specializes in ASD, Dr. Michael A. Ellis provides a holistic view of what comes after diagnosis. In user-friendly tones, he answers the most commonly asked questions about what it's actually like to live with ASD, what medications and therapies are available, and the global impact it has on the child's environment.

Unified Protocols for Transdiagnostic Treatment of Emotional Disorders in Children and Adolescents

Therapist Guide

Jill Ehrenreich-May, University of Miami, **Sarah M. Kennedy**, Children's Hospital Colorado, **Jamie A. Sherman**, University of Miami, **Emily L. Bielek**, University of Michigan, **Brian A. Buzzella**, VA San Diego's Family Mental Health Program, **Shannon M. Bennett**, Weill Cornell Medicine, and **David H. Barlow**, Boston University

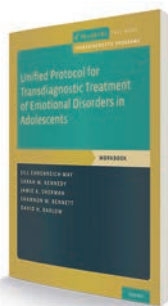

- Features a transdiagnostic model for working with children and adolescents with emotional disorders
- Easy-to-follow, session-by-session organization
- Applicable to a wide group of child and adolescent clients seen in typical practice

The *Unified Protocols for Transdiagnostic Treatment of Emotional Disorders in Children and Adolescents* suggest that there may be a simple and efficient method of utilizing effective treatment strategies, such as those commonly included in CBT, in a manner that addresses the broad array of emotional disorder symptoms in children and adolescents. The Unified Protocol for children and adolescents comprises a Therapist Guide, as well as two Workbooks, one for children, and one for adolescents.

Parent Training for Disruptive Behavior

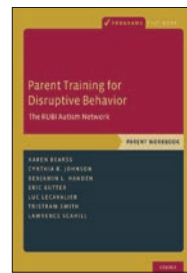

The RUBI Autism Network, Parent Workbook

Karen Bearss, Emory University School of Medicine, **Cynthia R. Johnson**, University of Florida, **Benjamin L. Handen**, University of Pittsburgh, **Eric Butter**, and **Luc Lecavalier**, both at The Ohio State University, **Tristram Smith**, University of Rochester Medical Center, and **Lawrence Scahill**, Emory University School of Medicine

Parent Training for Disruptive Behavior is an 11-session intervention for parents who wish to learn how to reduce disruptive behaviors and increase adaptive skills in their children with ASD. Each session introduces effective behavior change strategies and includes easy-to-use worksheets, checklists, and take-home activities to help parents apply what they have learned. By participating in this intervention with a trained therapist, parents can help their children overcome behavior problems, promoting happier kids and families.

Guns and Suicide

An American Epidemic

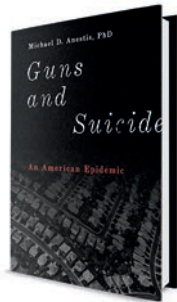

Michael D. Anestis, PhD
University of Southern Mississippi

- With rising suicide rates in the U.S., Anestis provides a much-needed understanding of suicide prevention and the critical role of means restriction
- Shifts the conversation about gun violence to suicides by guns, which make up the majority of gun deaths in the U.S.
- Anestis takes a poignant, balanced approach to reducing suicide risk; this is not a book about gun control

In *Guns and Suicide*, Michael Anestis reframes our perspective on gun violence by shifting the focus to suicide. Guns play a uniquely profound role in American suicide, and Anestis explains how they have this effect—not by making otherwise non-suicidal people want to die, but by facilitating suicide attempts among suicidal individuals.

Change

What Really Leads to Lasting Personal Transformation

Jeffrey A. Kottler, PhD
California State University – Fullerton

Today, psychologists and therapists who sit with clients session after session

have a unique window into the human psyche, watching the rhythms of change unfold in front of them every day, and yet the process remains a mystery. Research has shown that even in cases of unqualified success, the client and the therapist often have wildly different views on what made it work. Taking that as his starting point, Jeffrey Kottler leads the reader on an exploration of human behavior, seeking to find out what it is that really makes a difference that can lead to transformative and lasting change.

Feeling Good by Doing Good

A Guide to Authentic Self-Esteem and Well-Being

Christopher Mruk,
Bowling Green State University

Feeling Good by Doing Good offers a new evidence-based approach to defining, understanding, and increasing what is known as “authentic self-esteem.” Translating decades of research in the fields of self-esteem, humanistic psychology, positive psychology, and psychotherapy into everyday terms, Christopher Mruk traces the definition of self-esteem back to when it was first used to describe the value of “doing that which is both just and right.”

Postmodern Perspectives on Contemporary Counseling Issues

Approaches Across Diverse Settings

Edited by **Mark Scholl**,
Wake Forest University,
and **James Hansen**,
Oakland University

In *Postmodern Perspectives on Contemporary Counseling Issues*, the effective treatment of issues such as trauma, addiction, eating disorders, unemployment, and couples counseling are illustrated with numerous case examples. Rich descriptions of the implementation of postmodern approaches and techniques make this text ideal for counselors, psychotherapists, and other helping professionals.

If Your Adolescent Has ADHD

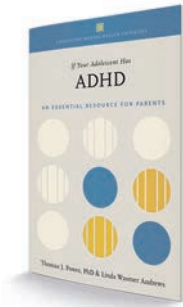

An Essential Resource for Parents In Collaboration with The Annenberg Public Policy Center

Thomas J. Power,
University of
Pennsylvania; Children's
Hospital of Philadelphia
(CHOP), and **Linda Wasmer Andrews**

- Offers reliable, up-to-date information on adolescent ADHD, including causes, symptoms, diagnosis, and treatment
- Provides practical, evidence-based advice from a leading psychologist on dealing with common issues, such as determining readiness to drive and instilling good homework and study habits
- Covers teen-specific topics such as adolescent friendships, dating, curfews, and sports and extracurricular activities—many of which receive short shrift in other books for parents

If Your Adolescent Has ADHD: An Essential Resource for Parents provides the up-to-date information and down-to-earth support that parents need. The book is an authoritative guide to teen ADHD, including symptoms, diagnosis, treatment, school interventions, and parenting strategies. It addresses common concerns, such as driving, curfews, extracurricular activities, and homework.

Solution-Focused Brief Therapy with Clients Managing Trauma

Edited by **Adam Froerer**,
Mercer University School of
Medicine, **Jacqui von Cziffra-
Bergs**, Private Practice,
Johnny Kim, University of
Denver School of Social Work,
and **Elliott Connie**, Private Practice

This book is a comprehensive overview of how Solution Focused Brief Therapy (SFBT) can be used as a treatment approach for working with clients managing various forms of trauma. It describes various clinical cases along with the current research supporting SFBT as an evidence-based practice.

Tech Generation

Raising Balanced Kids in Hyper-Connected World

Mike Brooks, Austin
Psychology & Assessment
Center, and **Jon Lasser**,
Texas State University

- Presents the “Tech Happy Life” model for technology use, grounded in research on effective parenting and psychology
- Authors offer a compelling, balanced approach to technology use that will resonate with parents
- Highlights the benefits of technology, as well as how to minimize its negative effects

Tech Generation: Raising Balanced Kids in a Hyper-Connected World guides parents in teaching their children how to reap the benefits of living in a digital world while also preventing its negative effects.

Evolutionary Psychopathology

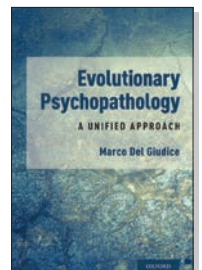

A Unified Approach

Marco Del Giudice,
University of New Mexico

Evolutionary Psychopathology takes steps toward a unified approach to psychopathology, using the concepts of life history theory

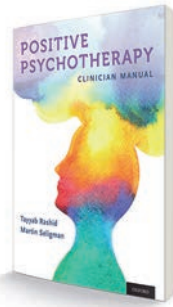

— a biological account of how individual differences in development, physiology and behavior arise from tradeoffs in survival and reproduction — to build an integrative framework for mental disorders.

Positive Psychotherapy Clinician Manual

Tayyab Rashid,
University of Toronto
Scarborough, and
Martin P. Seligman,
University of Pennsylvania

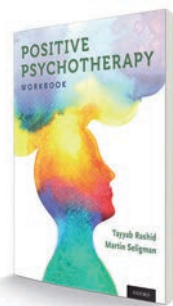

- Provides therapists with a session-by-session therapeutic approach based on the principles of positive psychology
- Contains 15 positive psychotherapy sessions, each complete with core concepts, guidelines, skills, and worksheets for practicing skills learned in session
- Explores character strengths and positive psychology practices, processes, and mechanisms of change

This clinician's manual begins with an overview of the theoretical framework for positive psychotherapy, exploring character strengths and positive psychology practices, processes, and mechanisms of change. The second half of the book contains 15 positive psychotherapy sessions, each complete with core concepts, guidelines, skills, and worksheets for practicing skills learned in session.

Positive Psychotherapy Workbook

Tayyab Rashid,
University of Toronto
Scarborough, and
Martin Seligman,
University of Pennsylvania

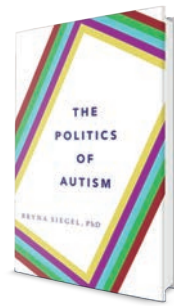

- Provides 15 positive psychotherapy sessions, each complete with lessons, guidelines, skills, and worksheets for practicing positive psychology skills learned in session
- Endows readers with a sense of purpose and meaning that many have found lacking in more traditional therapies

Positive Psychotherapy: Workbook guides readers through a session-by-session therapeutic approach based on the principles of positive psychology, an exciting new area of study examining the factors that enable us to flourish.

The Politics of Autism

Bryna Siegel, Autism
Center of Northern
California

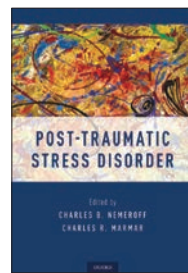

- All drawn from data—readers explore unabashed contrarian views on autism epidemiology, autism service provision, autism education, and autism research
- New viewpoints on 'old' issues: Is there more autism? What's wrong with how autism gets diagnosed? Are standard treatments really appropriate given the life course of people with autism? Why does fear of vaccines persist? Are we effectively allocating autism research dollars if the goal is to help people with autism?
- Points out the current weaknesses in the American system pertaining to autism and behavioral disabilities and suggests solutions and programs that can help strengthen support

The Politics of Autism explores controversies in autism epidemiology, problems in effective autism education, motivators of the alternative medicine and anti-vaccine movement in autism, and argues for the re-examination of autism research priorities from basic science to clinical studies aimed at improving lives of individuals and their families living with autism.

Post-Traumatic Stress Disorder

Edited by **Charles B. Nemeroff**, University of Miami Miller School of Medicine, and **Charles Marmar**, New York University

This volume brings together the leaders in the field of PTSD research to present an up-to-date summary and understanding of this complex disorder. All of our current knowledge and controversies concerning the diagnosis, epidemiology, course, pathophysiology and treatment are described in detail. The evidence for efficacy for each of the different forms of psychotherapy and pharmacotherapy is reviewed.

Headcase

LGBTQ Writers and Artists on Mental Health and Wellness

Edited by **Stephanie Schroeder**, and **Teresa Theophano**, Services and Advocacy for GLBT Elders (SAGE)

Headcase illustrates the intersection of mental wellness, illness, and LGBTQ identity, as well as the lasting impact of historical views deeming that to be gay or lesbian equated mental illness. The collection of pieces contained therein offer personal views from both providers and clients, often one and the same, talking about their experiences. The text breaks new ground in documenting issues in LGBTQ mental health care with superbly written and powerfully rendered personal and political stories and images.

The Oxford Handbook of Philosophy and Psychoanalysis

Edited by **Richard Gipps**, University of Oxford, and **Michael Lacey**, University College, London

While psychoanalysis is often equated with Freud, this comparison ignores the wide range of practices, methods, theories, and cross-pollinations with other disciplines that characterise psychoanalytic work. In this landmark book, leading researchers provide an overview of current thinking at the interface of philosophy and psychoanalysis.

Addictions Counseling

A Competency-Based Approach

Cynthia A. Faulkner,
Indiana Wesleyan University,
and **Samuel Faulkner**,
Texas A&M-Kingsville

Addictions Counseling employs the unique approach of following a client through the counseling process (intake, assessment, individual/group/family counseling, and discharge/relapse prevention planning). Along the way, readers are introduced to theories, techniques, and hands-on examples of what is required in the counseling process.

Transmitted Wounds

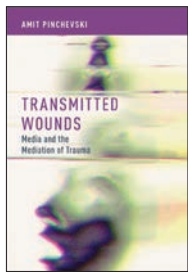

Media and the Mediation of Trauma

Amit Pinchevski,
The Hebrew University
of Jerusalem

Transmitted Wounds explores the ways media shape the social life of trauma both clinically and culturally. Through a series of case studies—from the radiocasts of the Eichmann trial to virtual reality therapy for PTSD—Pinchevski offers a bold thesis about the deep association of media and trauma: media bear witness to the human failure to bear witness, making the traumatic technologically transmissible and reproducible.

Healing Self-Injury

A Compassionate Guide for Parents and Other Loved Ones

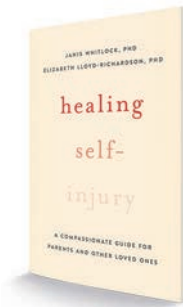

Janis Whitlock,
Cornell University,
and **Elizabeth E. Lloyd-Richardson**,
University of
Massachusetts
Dartmouth

- Provides a compassionate, accessible approach to the problem of self-injury in youth
- Helps parents identify causes of a child's self-injury, develop skills for managing it, and recognize when to seek professional help
- Emphasizes the importance of healthy family communication, especially around emotions

Parents who discover a teen's self-injurious behavior are gripped by uncertainty and flooded with questions - Why is my child doing this? Is this a suicide attempt? What did I do wrong? *Healing after Self-Injury* provides desperately-needed guidance to parents and others who love a young person struggling with self-injury.

Pause and Reset

A Parent's Guide to Preventing and Overcoming Problems with Gaming

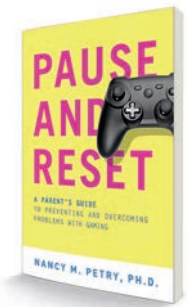

Nancy M. Petry,
University of
Connecticut School
of Medicine

- Offers three simple steps for reducing and reversing the harmful effects of gaming
- Grounded in scientific research, but accessibly-written
- Complete with role-playing exercises and worksheets to help parents develop conflict-solving skills

Pause and Reset is aimed at parents concerned about the role of gaming in their children's lives. In this informative, reader-friendly book, addiction expert Dr. Nancy Petry sheds light on what constitutes problematic video gaming and what does not, how to determine whether a child, adolescent or young adult may be "addicted" to gaming or developing problems with it, and when to seek professional help.

If You Build It They Will Come

And Other Myths of Private Practice in the Mental Health Professions

Jeffrey E. Barnett,
Loyola University Maryland,
and **Jeffrey Zimmerman**,
University of Connecticut

Jeffrey Barnett and Jeffrey Zimmerman share practical advice based on their decades of clinical experience to address common myths about private practice in an easily accessible manner. Myths addressed fall into the broad areas of preparing for private practice, building your practice, managing your practice, documentation and record keeping, and ethical practice.

How (not) to Train the Brain

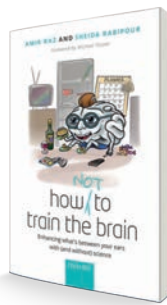

Enhancing What's Between Your Ears with (and without) Science

Amir Raz, and Sheida Rabipour, both at McGill University

- Provides readers with proven methods of improving their mental performance
- A clinical assessment of the brain training market
- Lively cartoons and inspirational quotes illustrate each chapter

Brain training is all the rage. Commercial and clinical initiatives capitalize on trailblazing research. This book offers a scientifically honest account of brain training that demolishes the unfounded claims made for brain training products, offering instead proven methods for improving your mental performance and capacity.

Handbook of Positive Body Image and Embodiment

Constructs, Protective Factors, and Interventions

Edited by Tracy L. Tylka, The Ohio State University, and Niva Piran, University of Toronto

This is the first comprehensive, research-based resource to address the breadth of innovative theoretical concepts and related practices concerning positive ways of living in the body, including positive body image and embodiment. This 37-chapter handbook reviews current knowledge on positive body image and embodiment, as well as future directions for work in these areas, which will be useful for mental health researchers, practitioners, advocates, and activists.

Handbook of Evidence-Based Mental Health Practice with Sexual and Gender Minorities

Edited by John E. Pachankis, Yale University, and Steven A. Safren, University of Miami

- The first collection of evidence-based approaches to treating sexual and gender minorities' mental health
- Contains how-to guidance and case material for treating sexual and gender minority clients
- Integrates cutting-edge research with clinical wisdom

The *Handbook of Evidence-Based Mental Health Practice with Sexual and Gender Minorities* represents the first compendium of evidence-based approaches to sexual and gender minority (SGM)-affirmative mental health practice. Each chapter includes conceptual background and practical guidance so that mental health practitioners, researchers, educators, and students can both understand how to implement each of these approaches and develop future tests of their efficacy and the efficacy of other SGM-affirmative approaches.

Psychodynamic Therapy Techniques

A Guide to Expressive and Supportive Interventions

Brian A. Sharpless, Argosy University

Therapists help their patients improve through a combination of words and a therapeutic relationship. To do this effectively, practitioners need to know not only what to intervene on (i.e., how to identify and understand clinical problems) but also how to intervene (viz., what techniques to use). This book teaches therapists how to develop and use the many techniques of psychodynamic psychotherapy.

Old and High

A Guide to Understanding the Neuroscience and Psychotherapeutic Treatment of Baby-Boom Adults' Substance Use, Abuse, and Misuse

Robert Youdin, Princeton University

Old and High exposes and addresses the hidden epidemic of older adults experiencing psychotropic substance dependence—and their consequential mental health needs. It provides insight for clinical professionals in psychology, social work, gerontology, nursing, and medicine on how to integrate current neuroscience findings with contemporary psychotherapy techniques and harm-reductive interventions to help older adults achieve successful recovery from substance abuse problems.

The Medical Model in Mental Health

An Explanation and Evaluation

Ahmed Samei Huda, Pennine Care NHS Foundation Trust

The Medical Model in Mental Health: An Explanation and Evaluation explores the overlap between the usefulness of diagnostic constructs (which enable prognosis and treatment decisions) and the therapeutic effectiveness of psychiatry compared with general medicine. The book explains the medical model and how it applies in mental health, and defends psychiatry as a medical practice.

Psychotherapy Relationships that Work

THIRD EDITION

Edited by **John C. Norcross**, University of Scranton, **Michael J. Lambert**, Brigham Young University

The definitive, evidence-based book on the psychotherapy relationship: what works in general (volume 1) and what works for particular patients (volume 2). Each chapter presents definitions, clinical examples, landmark studies, comprehensive meta-analyses, diversity considerations, training implications, and ends with bulleted clinical practices. The third edition features expanded coverage and updated reviews with an enhanced practice focus.

VERY SHORT INTRODUCTIONS

Consciousness

A Very Short Introduction

SECOND EDITION

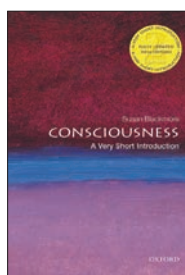

Susan Blackmore,
University of Plymouth

Some of our most burning questions surround consciousness:

What creates our identity? Do we really have free will? Is consciousness itself an illusion? The rapid rate of developments in brain science continues to open up debate on these issues. This book clarifies the complex arguments and illuminates the major theories on consciousness.

Very Short Introductions

UK: Sep 2017 / US: Dec 2017

Identity

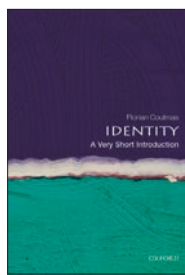

A Very Short Introduction

Florian Coulmas,
Duisburg-Essen
University

'Identity' as a concept has many faces, and its very versatility in different contexts can make it hard to define. Florian Coulmas discusses the many meanings of this slippery concept, considering why individual and collective identities are important to us, and discussing the problems asserting individual identities can create.

Mirror-Touch Synaesthesia

Thresholds of Empathy with Art

Edited by **Daria Martin**,
University of Oxford

People with mirror-touch synaesthesia feel a physical sense of touch on their own bodies when they witness touch to other people and often to objects. This book brings together essays and conversations by prominent neuroscientists, anthropologists, artists, art theorists, curators, film theorists, and philosophers, to explore this phenomenon.

UK: Sep 2017 / US: Oct 2017

NEW IN PAPERBACK

Aesthetics and the Sciences of Mind

Edited by **Greg Currie**,
University of York, **Matthew Kieran**,
and **Aaron Meskin**,
both at University of Leeds,
and **Jon Robson**, University
of Nottingham

How far should philosophical accounts of the value and interpretation of art be sensitive to the scientific approaches used by psychologists, sociologists, and evolutionary thinkers? A team of experts urge different answers to this question, and explore how empirical inquiry can shed light on problems traditionally regarded as philosophical.

NEW EDITION

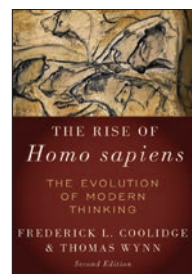

The Rise of Homo Sapiens

The Evolution of Modern Thinking

SECOND EDITION
Frederick L. Coolidge,
and **Thomas Wynn**, both at
University of Colorado

The Rise of Homo Sapiens is an introduction to human cognitive evolution written by psychologist Frederick L. Coolidge and archaeologist Thomas Wynn. The text differs from other treatments of cognitive evolution in its reliance on the archaeological record, and its emphasis on working memory, the most thoroughly investigated cognitive model of the last half-century.

Understanding Vision

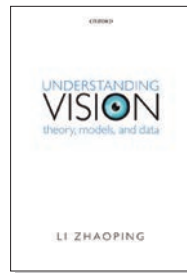

Theory, Models, and Data

Li Zhaoping,
University College London

Vision science has grown hugely in the past decades, but there have been few books showing readers how to adopt a computational approach to understanding visual perception, along with the underlying mechanisms in the brain. This book explains the computational principles and models of biological visual processing, and in particular, primate vision.

UK: May 2018 / US: Jun 2018

Sizing up Consciousness

Towards an Objective Measure of the Capacity for Experience

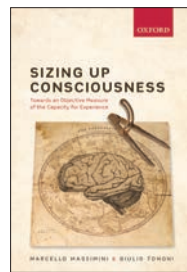

Marcello Massimini,
University of Milan,
Giulio Tononi, University of
Wisconsin – Madison School
of Medicine

Translator **Frances Andersen**

This book explores how we can measure consciousness. It clarifies what consciousness is, how it can be generated from a physical system, and how it can be measured. It also shows how conscious states can be expressed mathematically and how precise predictions can be made using data from neurophysiological studies.

Alzheimer's Disease and Dementia

What Everyone Needs to Know®

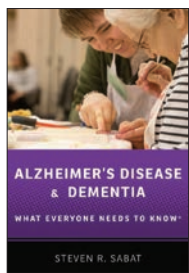

Steven R. Sabat,
Georgetown University

Alzheimer's Disease and Dementia: What Everyone Needs to Know® provides information not only about these conditions, but, crucially, about the many psychological and social strengths possessed by people diagnosed. Identifying and using those strengths can improve the quality of life of all concerned in non-pharmacological ways. This book thoroughly informs readers of the clinical history of these conditions, their causes and treatments, and methods of caring for and communicating effectively with those with AD.

OXFORD LIBRARY OF PSYCHOLOGY

The Oxford Handbook of Spontaneous Thought

Mind-Wandering, Creativity, and Dreaming

Edited by **Kieran C.R. Fox**, Stanford University, and **Kalina Christoff**, University of British Columbia

This *Handbook* is the first of its kind to bring together views from neuroscience, psychology, philosophy, phenomenology, history, education, contemplative traditions, and clinical practice to explore the ubiquitous but poorly understood mental phenomena that we collectively call 'spontaneous thought,' including mind-wandering, daydreaming, insight, creative thinking, and dreaming.

Oxford Library of Psychology

The Oxford Handbook of 4E Cognition

Edited by **Albert Newen**, Ruhr-University Bochum, **Leon De Bruin**, Radboud University, and **Shaun Gallagher**, University of Memphis

4E cognition (embodied, embedded, enactive, and extended) assumes that cognition is shaped and structured by dynamic interactions between the brain, body, and both the physical and social environments. With essays from leading scholars and researchers, *The Oxford Handbook of 4E Cognition* is the definitive work on this burgeoning field.

The Aesthetic Animal

Henrik Hogh-Olesen, Aarhus University

- Examines what drives the aesthetic impulse in humans
- Illuminates what makes us decorate our surroundings and ourselves
- Reveals why we paint, sing, dance, compose, and perform music

The Aesthetic Animal answers the ultimate questions of why we adorn ourselves, embellish our things and surroundings, and produce art, music, song, dance and fiction. This must-read presents an original and comprehensive synthesis of the empirical field, synthesizing data from archeology, cave art, anthropology, biology, evolutionary psychology and neuro-aesthetics.

Perception

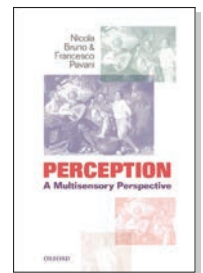

A Multisensory Perspective

Nicola Bruno, Università di Parma, and **Francesco Pavani**, Università di Trento

This book adopts a multisensory approach to understanding perception. Within it, the authors define perception as intrinsically multisensory from the start and examine multisensory interactions as the key process behind how we perceive our own body, control its movements, and perceive and recognise objects, space, and time.

Named one of the Best Books of 2018 on
Aging Well, *Wall Street Journal*

Better With Age

The Psychology of Successful Aging

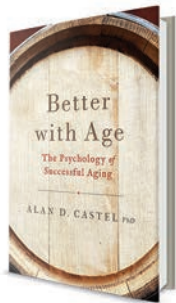

Alan D. Castel,
University of California,
Los Angeles

- Highlights how old age is not all downhill by illustrating the paradoxes and pleasures of old age, and new research about successful aging
- Features personal interviews and insights from Maya Angelou, Bob Newhart, Jared Diamond, John Glenn, and John Wooden
- Shows what activities one can do to age well, how attitudes and expectations about aging are linked to how we age, and ways to enjoy older age

Better with Age is about how our beliefs, behaviors, and expectations influence how well we age. This book presents the paradoxes and pleasures of old age, new research and personal interviews with famous role models of successful aging, and what we can do now to enjoy old age.

Art, Aesthetics, and the Brain

Edited by

Joseph P. Huston,
University of Düsseldorf,

Marcos Nadal,
University of Vienna,

Francisco Mora,
Universidad Complutense,
Luigi F. Agnati, University
of Modena, Italy, and

Camilo José Cela Conde,
University of the Balearic Islands

- Brings together work by researchers from diverse disciplines, providing the reader with multiple perspectives
- Includes full sections on visual arts, music and dance, avoiding the traditional and unjustified focus strictly on painting
- The contributors are renowned researchers in the field of the cognitive neuroscience of art and aesthetics

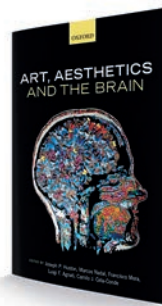

What neural processes underlie the appreciation of painting, music, and dance? How did such processes evolve? This book brings together experts in genetics, psychology, neuroimaging, neuropsychology, art history, and philosophy to explore these questions. It sets the stage for a cognitive neuroscience of art and aesthetics.

UK: Oct 2018 / US: Nov 2018

978-0-19-882523-4 | PB | 568pp £39.99/\$55

Available as an Ebook | Available in Oxford Scholarship Online

Featured in the *New York Times* and the
Wall Street Journal

How Art Works

A Psychological Exploration

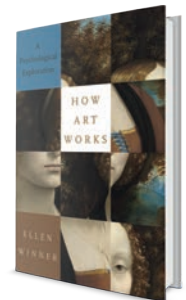

Ellen Winner,
Boston College

- The first book to illuminate art through philosophical and psychological approaches
- Examines explicit philosophical questions about the arts and their surprising answers
- Reveals how social scientists have investigated art and uncovers paths for exploration

This book examines puzzles about the arts wherever their provenance - as long as there is empirical research using the methods of social science (interviews, experimentation, data collection, statistical analysis) that can shed light on these questions. The examined research reveals how ordinary people think about these questions, and why they think the way they do - an inquiry referred to as intuitive aesthetics.

OXFORD HANDBOOKS

The Oxford Handbook of Lying

Edited by **Jörg Meibauer,**
Johannes Gutenberg
University

This *Handbook* brings together past and current research on all aspects of lying and deception, from the combined perspectives of linguistics, philosophy, and psychology. It will be an essential reference for students and researchers in these fields and will contribute to establishing the vibrant new field of interdisciplinary lying research.

The Oxford Handbook of Taboo Words and Language

Edited by **Keith Allan,**
Monash University

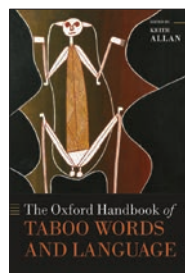

This volume brings together experts from a wide range of disciplines to define and describe taboo words and language and to investigate the reasons and beliefs behind them. It examines topics such as impoliteness, swearing, censorship, taboo in deaf communities, translation of tabooed words, and the use of taboo in banter and comedy.

LSD

My Problem Child

Albert Hofmann

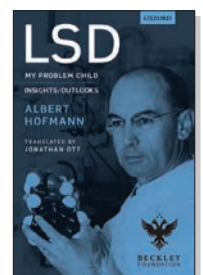

Albert Hofmann, who died in 2008 aged 102, synthesised LSD in 1938. Although his work produced other important drugs, it was LSD that shaped his career. Shortly before his death,

Hofmann approved a new and updated translation of his autobiography (first published by McGraw Hill in 1979). It appears here for the first time in print.

When Fiction Feels Real

Representation and the Reading Mind

Elaine Auyoung,

University of Minnesota

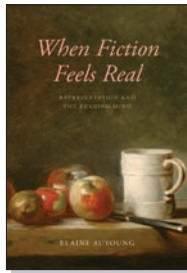

When Fiction Feels Real offers a new approach to the phenomenology of reading by engaging with psychological research on reading and cognition. Focusing on the work of Jane Austen, Charles Dickens, George Eliot, Leo Tolstoy, and Thomas Hardy, Elaine Auyoung demonstrates what nineteenth-century writers know about the pleasure of literary experience.

Time Will Tell

A Theory of Dynamic Attending

Mari Riess Jones,

The Ohio State University

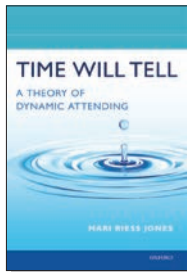

Attention is a central concept in psychology. The term 'attention' itself has persisted, even though it implies a static, insulated capacity that we use when it is necessary to focus upon some relevant or stimulating event. Riess Jones presents a different way of thinking about attention; one that describes it as a continuous activity that is based on energy fluctuating in time. Here, attending is portrayed as a dynamic interaction of an individual within his or her surroundings.

Conflict

How Soldiers Make Impossible Decisions

Neil D. Shortland,

University of Massachusetts Lowell,

Laurence J. Alison,

University of Liverpool,

and **Joseph M. Moran,**

Harvard University

- Provides an understanding of the psychology behind military decision making
- Presents a series of least-worst decisions faced by individuals across all levels of command
- Ensures that the psychological analysis of decision making does not lose its grounding in reality

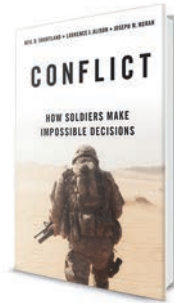

Conflict: How Soldiers Make Impossible Decisions is about making hard choices—where all outcomes are potentially negative. The authors draw on interviews conducted with soldiers about the situations they faced and the decisions they made in war. These vivid and sometimes distressing stories allow the authors to explore the cognitive processes associated with choice, goal-directed thinking, innovation, and courage.

Concepts in the Brain

The View From Cross-linguistic Diversity

David Kemmerer,

Purdue University

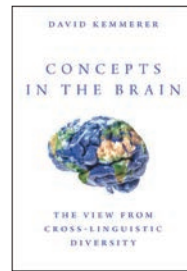

There are roughly 6,500 languages in the world, and they display numerous similarities and differences in the concepts that they encode. This book argues that cognitive neuroscientists must take these findings seriously if they are ever to achieve a truly comprehensive, pan-human account of the cortical underpinnings of semantic knowledge.

Possessed

Why We Want More Than We Need

Bruce Hood,

Bristol University

- A highly readable account of our drive to acquire possessions
- A revealing view of ownership that sheds light on the growing political turmoil sweeping Western democracies
- A creative synergy of psychology, biology, history, economics and politics

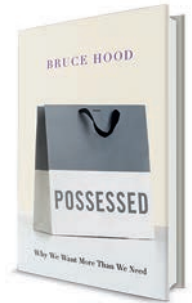

Possessed is the first accessible book to consider the psychological origins and future of ownership in a rapidly changing world. It reveals how we are compelled to accumulate possessions in a relentless drive to seek status and approval by signaling our values to others by what we own. It traces the history of ownership but looks to the future as our drive to own will need to adapt to environmental and technological change.

Squeezing Minds From Stones

Cognitive Archaeology and the Evolution of the Human Mind

Edited by **Karenleigh A. Overmann,**

University of Bergen, and **Frederick L. Coolidge,**

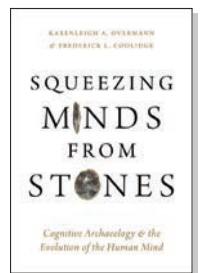

University of Colorado, Colorado Springs

This book is a collection of essays from early pioneers in the field like archaeologists Thomas Wynn and Iain Davidson and evolutionary primatologist William McGrew, to 'up and coming' newcomers like Shelby Putt, Ceri Shipton, Mark Moore, James Cole, Natalie Uomini, and Lana Ruck. Their essays address a wide variety of cognitive archaeology topics, including the value of experimental archaeology, primate archaeology, the intent of ancient tool makers, and how they may have lived and thought.

Cerebral Cortex

Principles of Operation

Edmund T. Rolls, Oxford Centre for Computational Neuroscience

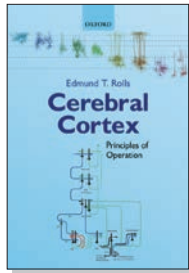

This book provides insights into the principles of operation of the cerebral cortex. These principles are key to understanding how we, as humans, function. The book includes Appendices on the operation of many of the neuronal networks described in the book, together with simulation software written in Matlab.

Ecology of the Brain

The Phenomenology and Biology of the Embodied Mind

Thomas Fuchs, University of Heidelberg

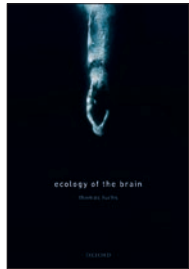

Present day neuroscience places the brain at the centre of study. But what if researchers viewed the brain not as the foundation of life, rather as a mediating organ? Ecology of the Brain addresses this very question. It considers the human body as a collective, a living being which uses the brain to mediate interactions.

The Elephant in the Brain

Hidden Motives in Everyday Life

Kevin Simler and Robin Hanson, George Mason University; Oxford University

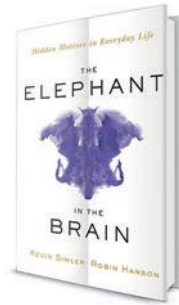

- A social critique and contrarian view that challenge the status quo
- Challenges how you think about yourself and how you see the world by shining a light on things people would rather stay hidden
- Wide-ranging, covering many fields and current events, and offering many concrete relatable examples

This book exposes our unconscious selfish motives, those we're reluctant to discuss or even think about. These motives drive our body language, laughter, and conversation, as well as venerated institutions like art, school, charity, medicine, politics, and religion. You'll never see yourself, or the world, the same again.

Living Machines

A Handbook of Research in Biomimetics and Biohybrid Systems

Edited by Tony J. Prescott, The University of Sheffield, Nathan Lepora, University of Bristol, and Paul F.M.J. Verschure, Catalan Institute for Bioengineering

Contemporary research in the field of robotics attempts to harness the versatility and sustainability of living organisms with the hope of rendering a renewable, adaptable, and robust class of technology that can facilitate self-repairing, social, and moral—even conscious—machines. This landmark volume surveys this flourishing area of research.

The Spaces Between Us

A Story of Neuroscience, Evolution, and Human Nature

Michael Graziano, Princeton University

- Written in a narrative style with clarity, humor, drama, and personal connection
- Offers insight on what is going on inside the brain of those with developmental disability
- Describes the author's personal struggles raising a son diagnosed with dyspraxia

Hidden beneath consciousness, the brain mechanisms controlling personal space affect every aspect of our lives— social, emotional, cultural, and practical. A neuroscientist, award-winning novelist, and science columnist for *The Atlantic*, Graziano tells this compelling story with humor, drama, and a deeply personal connection.

NEW EDITION

The Nature of Emotion

Fundamental Questions

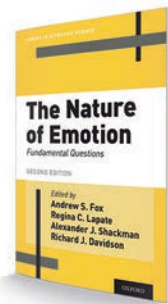

SECOND EDITION

Edited by **Andrew S. Fox**, University of California, Davis, **Regina C. Lapate**, University of California-Berkeley, **Alexander J. Shackman**, University of Maryland, and **Richard J. Davidson**, University of Wisconsin-Madison

- 100 worldwide leading emotion researchers tackle 14 fundamental questions about the nature and origins of emotion
- Critical questions include: What is an emotion? How are emotions organized in the brain? How do emotion and cognition interact? How are emotions embodied in the social world? How and why are emotions communicated? How are emotions physically embodied? What develops in emotional development?
- Editors Andrew Fox, Regina Lapate, Alexander Shackman, and Richard Davidson highlight key areas in each chapter

Not a textbook offering a single viewpoint, *The Nature of Emotion* reveals the central issues in emotion research and theory in the words of the leading scientists working in the field today, providing a unique and highly accessible guide for students, researchers, and clinicians.

Human Performance Optimization

The Science and Ethics of Enhancing Human Capabilities

Edited by **Michael D. Matthews**, U.S. Military Academy, West Point, and **David M. Schnyer**, University of Texas, Austin

Human Performance Optimization: The Science and Ethics of Enhancing Human Capabilities explores current and emerging strategies for enhancing individual and team performance, especially in high-stakes, stressful settings such as the military, law enforcement, firefighting, or competitive corporate settings. Taking a cognitive neuroscience perspective, scientifically grounded approaches to optimizing human performance are explored in depth.

Neuroscience at the Intersection of Mind and Brain

Jack M. Gorman, Franklin Behavioral Health Consultants

Every time we have an experience, feel an emotion, or take an action our brains must respond and change the way they work. Written by a psychiatrist who spent three decades studying human behavior and brain function, this book is an accessible introduction to how our brains work, how experience changes our brains, and how medications and psychotherapy affect the cells and connections in our brains.

The Mismatch Negativity

A Window to the Brain

Risto Näätänen, University of Tartu, **Teija Kujala**, University of Helsinki, and **Gregory Light**, University of California, San Diego

The mismatch negativity (MMN) is the electrophysiological change-detection response of the brain, stimulated by discernible change to a repetitive sequence of sound. MMN has become a popular tool for studying perceptual, memory, and learning functions. This book provides an introduction to MMN and its contribution within different clinical fields.

Your Brain on Food

How Chemicals Control Your Thoughts and Feelings

THIRD EDITION

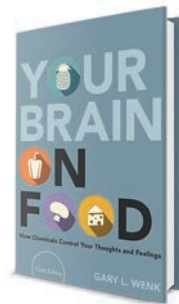

Gary L. Wenk, Ohio State University

- An illuminating and humorous look at how the substances we eat affect the brain
- Features insight into two epidemics in America: opioid addiction and obesity
- No prior knowledge of the brain or body physiology required

This book vividly demonstrates how a little knowledge about the foods and drugs we eat can teach us a lot about how our brain functions. Dr. Wenk has skillfully blended the highest scholarly standards with illuminating insights, gentle humor and welcome simplicity.

Brains As Engines of Association

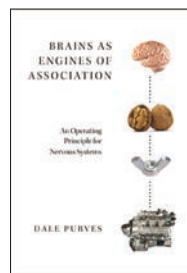

An Operating Principle for Nervous Systems

Dale Purves, Duke University

Brains As Engines of Association unravels how human brains operate. Based on evidence from vision, audition, speech and music, Purves argues that brains function wholly on the basis of trial and error experience that has been encoded in neural circuitry over evolutionary and individual time. The theory presents a challenge to all neuroscientists.

Banned Emotions

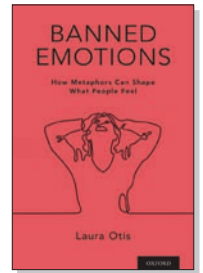

How Metaphors Can Shape What People Feel

Laura Otis, Emory University

Banned Emotions, written by neuroscientist-turned-literary scholar Laura Otis, draws on the latest research in neuroscience and psychology to challenge popular attempts to suppress certain emotions. Examining works by Dante, Dickens, Dostoevsky, Kafka, Forster, and Woolf in parallel with *Bridesmaids*, *Fatal Attraction*, and *Who Moved My Cheese?*, Otis traces pervasive patterns in the ways emotions are represented that can make people so ashamed of their feelings, they may stifle emotions they need to work through.

The Brain from Inside Out

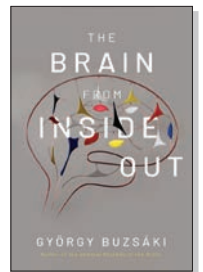

Gyorgy Buzsáki

New York University

György Buzsáki's *The Brain from Inside Out* examines why the outside-in framework for understanding brain function have become stagnant and points to new directions for understanding neural function. Building upon the success of *Rhythms of the Brain*, Professor Buzsáki presents the brain as a foretelling device that interacts with its environment through action and the examination of action's consequence.

Franz Joseph Gall

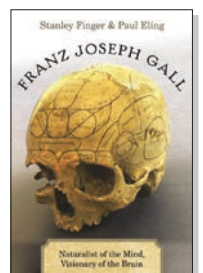

Naturalist of the Mind, Visionary of the Brain

Stanley Finger, Washington University, and **Paul Eling**, Radboud University

Franz Joseph Gall, a dedicated physician and scientist, is unfortunately most remembered for his controversial doctrine that would become known as phrenology. Although often portrayed as a discredited buffoon who believed he could assess a person's strengths and weaknesses by measuring cranial bumps, Gall strove to answer pressing questions about the mind, brain, and behavior. This work presents a fresh look at Gall, both his life and seminal ideas, some of which—for example, cortical localization of function—would become tenets of modern behavioral neuroscience.

UK: Jun 2019 / US: May 2019

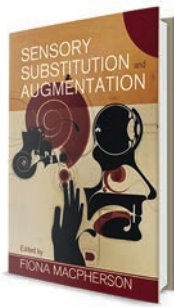

978-0-19-046462-2 | HB | 640pp £62/\$95

Sensory Substitution and Augmentation

Edited by
Fiona Macpherson,
University of Glasgow

- Offers the latest in empirical research on sensory substitution and augmentation
- Provides a cross-disciplinary approach by containing essays by neuroscientists, psychologists, and philosophers
- Challenges our understanding of the potential of devices to be used to alter skills and abilities

Fiona Macpherson brings together neuroscientists, psychologists and philosophers to focus on the nature of the perceptual experiences, the sensory interactions, and the changes that occur in the mind and brain while using these technologies.

AACN WORKSHOP SERIES

NEW EDITION

Ethical Decision Making in Clinical Neuropsychology

SECOND EDITION

Shane S. Bush, Long Island Neuropsychology, P.C.; VA New York Harbor Healthcare System; University of Alabama

The primary purpose of this second edition is to review ethical guidelines and literature relevant to clinical neuropsychology that have been published since the first edition of this book was published a decade ago. A number of important publications have emerged since the first edition was published, including new Specialty Guidelines for Forensic Psychology, Standards for Educational and Psychological Testing, and position statements/practice guidelines by APA.

Neuropsychological Evaluation of the Child

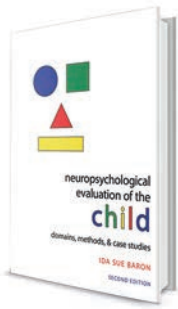

Domains, Methods, and Case Studies
SECOND EDITION

Ida Sue Baron

- A unique and practical edition that compiles published and unpublished normative data for individual neuropsychological tests in one resource/reference text
- Reviews basic skills required for history taking, administration, interpretation, and communication of results
- Addresses critical topics in neuropsychology and neurology in domain-specific chapters

This updated and expanded edition retains a practical developmental and lifespan perspective for neuropsychological case formulation. Chapters cover the current status, clinical issues, and essential domains and techniques in clinical neuropsychological practice and research, and include case vignettes that explicate brain-behavior relationships in youth from preschool-age through adolescence with medical disease or psychological disorder.

OXFORD LIBRARY OF PSYCHOLOGY

The Oxford Handbook of Music Psychology

SECOND EDITION

Edited by **Susan Hallam**, University College London, **Ian Cross**, University of Cambridge, and **Michael Thaut**, Colorado State University

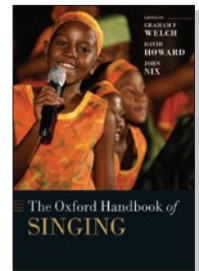

- A new and updated edition of a landmark text in the field of music psychology, providing a broad overview of this rapidly growing field of research
- Includes a range of international experts in this field - both as section editors and chapter authors, resulting in a volume which presents the best work currently being done in the field
- No equivalent volume exists in the field of music psychology, making this a 'must-have' book for those seeking the broadest possible overview of the field

The second edition of *The Oxford Handbook of Music Psychology* updates the original landmark text, providing a comprehensive review of the latest developments in this fast growing area of research. With contributions from internationally recognised experts, it is an essential resource for students and researchers in psychology.

The Oxford Handbook of Singing

Edited by **Graham F. Welch**, University College London, **David M. Howard**, University of London, UK, and **John Nix**, University of Texas at San Antonio

Singing has been a characteristic behaviour of humanity across several millennia. Including fifty-three chapters by seventy-two authors, drawn from across the world, *The Oxford Handbook of Singing* is a landmark text on this topic. It is a comprehensive resource that is essential for anyone who wishes to know more about the nature of singing.

NEW EDITION

Psychopharmacology

Drugs, the Brain, and Behavior

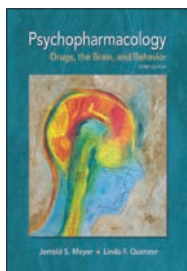

THIRD EDITION

Edited by **Jerrold S. Meyer**, University of Massachusetts - Amherst and **Linda F. Quenzer**, University of Hartford

Unique in its breadth of coverage ranging from historical accounts of drug use to clinical and preclinical behavioral studies, *Psychopharmacology* is appropriate for undergraduates studying the relationships between the behavioral effects of psychoactive drugs and their mechanisms of action.

Neuropsychology

A Review of Science and Practice, Volume 3

Edited by **Sandra Koffler**, Drexel University College of Medicine; Private Practice, **E. Mark Mahone**, Kennedy Krieger Institute, **Bernice A. Marcopulos**, James Madison University, **Douglas E Johnson-Greene**, University of Miami, and **Glenn Smith**, University of Florida Health

Neuropsychology: A Review of Science and Practice provides a comprehensive and critical review of the recent literature in selected topics in the discipline of neuropsychology. The chapters, written by authors with histories of scholarship and expertise, review recent articles applicable to neuropsychology and related disciplines, and have sufficient theoretical importance to influence practice and the direction of future investigations.

The Child as Musician

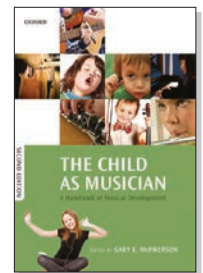

A Handbook of Musical Development

SECOND EDITION

Edited by **Gary E. McPherson**, University of Melbourne

The new edition of *The Child as Musician* celebrates the richness and diversity of the many different ways in which children can engage in and interact with music. It presents theory - both cutting edge and classic - in an accessible way for readers by surveying research concerned with the development and acquisition of musical skills.

NEW IN PAPERBACK

Music, Evolution, and the Harmony of Souls

Alan R. Harvey, The University of Western Australia

- The first book about music that discusses human evolution in detail
- Offers new perspectives on the biological and cultural history of our species
- Demonstrates the value of music in education and therapy

Music, Evolution, and the Harmony of Souls demonstrates the evolutionary sociobiological importance of music as a driver of cooperative and interactive behaviour throughout human existence, and what this evolutionary imperative means to twenty-first century humanity and beyond, from social and medical/neurological perspectives.

Speaking for Ourselves

Conversations on Life, Music, and Autism

Michael B. Bakan, Florida State University

The musical talents and affinities of autistic people are widely recognized, but few have thought to ask autistic people themselves about how they make and experience music, and why it matters them that they do. *Speaking for Ourselves* does just that, bringing autistic voices to the center of the conversation.

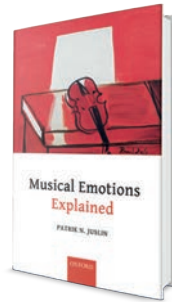

UK: Jul 2018 / US: May 2018

Musical Emotions Explained

Patrik N. Juslin, Uppsala University

- The first single-author book in psychology to offer a coherent account of musical emotions
- Explains with both clarity and rigour the manifold ways in which music may engage our emotions
- Sufficiently engaging to attract lay readers, yet comprehensive and novel enough to attract specialists
- Richly illustrated with several music examples from everyday life

Can music really arouse emotions? If so, what emotions, and how? Based on ground-breaking research, *Musical Emotions Explained* explores how music expresses and arouses emotions, and how it becomes an object of aesthetic judgments. The book is accessibly written by one of the leading researchers in the field worldwide.

The Psychology of Music

A Very Short Introduction

Elizabeth Hellmuth Margulis, University of Arkansas

The Psychology of Music: A Very Short Introduction seeks to answer fundamental questions of enduring interest, such as "What is musicality?" and "How does music move us?" In doing so, it reveals what happens when science attempts to confront some of the deepest questions about music.

Music and Consciousness 2

Worlds, Practices, Modalities

Edited by **Ruth Herbert**, University of Kent, **David Clarke**, University of Newcastle upon Tyne, and **Eric Clarke**, University of Oxford

Consciousness has been described as one of the most mysterious things in the universe. Following its forebear, this volume argues that music can provide a valuable route to understanding consciousness. It argues that consciousness extends beyond the brain, and is fundamentally related to selves engaged in the world, culture, and society.

Why Children Follow Rules

Legal Socialization and the Development of Legitimacy

Tom R. Tyler, Yale University, and Rick Trinkner, Arizona State University

Why Children Follow Rules focuses on the process by which children and adolescents develop their orientation toward the law. Drawing on law, psychology, sociology and criminology, Tom Tyler and Rick Trinkner review the literature on socialization with a particular focus on families, schools, and the juvenile justice to reveal a fundamental conflict about how authority and power should be exercised in essential social institutions.

The Age of Culpability

Children and the Nature of Criminal Responsibility

Gideon Yaffe, Yale Law School

Gideon Yaffe presents a theory of criminal responsibility according to which child criminals deserve leniency not because of their psychological, behavioural, or neural immaturity but because they are denied the vote. He argues that full shares of criminal punishment are deserved only by those who have a full share of say over the law.

Family Guide to Mental Illness and the Law

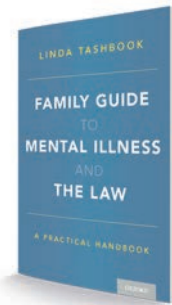

A Practical Handbook

Linda Tashbook, University of Pittsburgh School of Law

- Offers practical guidance to handling legal challenges and complicated circumstances affecting loved ones with mental illness
- Translates complicated legal principles into straightforward language
- Empowers readers to navigate health-related legal rights and to be useful in hearings about guardianship, involuntary commitment, bankruptcy, and more

Family Guide to Mental Illness and the Law offers the nuts-and-bolts legal information and problem-solving steps families need. This accessible resource explains how common legal issues uniquely impact people with various forms of mental illness and what family members can do to help.

The Roots of Modern Psychology and Law

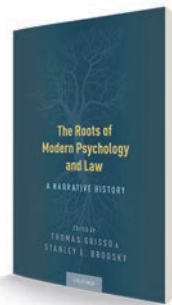

A Narrative History

Edited by Thomas Grisso, University of Massachusetts Medical School, and Stanley L. Brodsky, The University of Alabama

- Shows the development of the field of psychology and law through the narratives of its founders
- Entirely devoted to the history of psychology and law
- Publication coincides with the 50th Anniversary of the American Psychology-Law Society

The Roots of Modern Psychology and Law: A Narrative History reveals how the field developed during the first decade following the founding of the American Psychology-Law Society. The contributors to this edited volume, widely considered to be among the "founders" of the field, were responsible for establishing and nurturing many of the subfields and topics in psychology and law or forensic psychology that flourished across the next fifty years.

Traumatic Divorce and Separation

The Impact of Domestic Violence and Substance Abuse in Custody and Divorce

Lisa Fischel-Wolovick,
City University of New York

This book is an integration of the study of trauma, divorce, and separation impacted by domestic violence, substance abuse, and mental illness. While the original research on divorce took place at roughly the same time as the field of trauma, social scientists did not integrate an understanding of trauma into their understanding of domestic violence and divorce. During divorce, such families are impacted by a history of traumatic exposure to abuse and require court intervention that cannot be addressed by mediation or alternative dispute resolution.

Assessing Negative Response Bias in Competency to Stand Trial Evaluations

Steven J. Rubenzer, Forensic
Sobriety Assessment, LLC

Assessing Negative Response Bias in Competency to Stand Trial Evaluations provides readers with a comprehensive guide to assessing whether a defendant has feigned mental impairment during a competency to stand trial evaluation, or simply did not put forth his/her best effort. This book reviews the literature on assessing feigning and negative response bias, with particular focus on issues, tests, and data relevant to CST evaluations, and examines proposed criteria and statistical methods of determining and classifying assessment results.

Objection

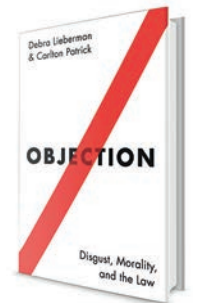

Disgust, Morality, and the Law

Debra Lieberman,
University of Miami,
and **Carlton Patrick**,
University of Central
Florida

- Sets forth a novel psychological explanation for why the emotion of disgust and our sense of morality are deeply intertwined
- Authors argue for why disgust should not be used as a criterion for lawmaking
- Opens up the debate for whether or not certain behaviors can be deemed "wrong" absent of a gut feeling that they are "gross" or "offensive"

In *Objection*, psychologists Debra Lieberman and Carlton Patrick examine disgust and its impact on the legal system to show why the things that we find stomach-turning so often become the things that we render unlawful.

AMERICAN PSYCHOLOGY-LAW SOCIETY SERIES

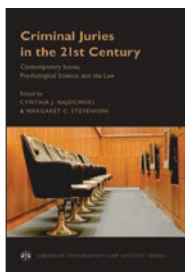

Criminal Juries in the 21st Century

Psychological Science and the Law

Edited by **Cynthia Najdowski**, University at Albany, and **Margaret Stevenson**, University of Evansville

Criminal Juries in the 21st Century explores the increasingly wide gulf between criminal trial law, procedures, and policy, and what scientific findings have revealed about the human experience of serving as a juror. Readers will contemplate myriad legal issues that arise when jurors decide criminal cases as well as cutting-edge psychological research that can be used to not only understand the performance and experience of the contemporary criminal jury, but also to improve it.

A System of Pleas

Social Sciences Contributions to the Real Legal System

Edited by **Vanessa A. Edkins**, Florida Institute of Technology, and **Allison D. Redlich**, George Mason University

This work is both a culmination of the current state of plea bargaining research and a call to action for future researchers. All of the areas addressed - from innocents pleading guilty to prosecutor charging decisions to mass incarceration and felon disenfranchisement - merge to create a picture of our current criminal justice system as it really is, and how social science can move forward within it.

LGBTQ Divorce and Relationship Dissolution

Psychological and Legal Perspectives and Implications for Practice

Edited by **Abbie E. Goldberg**, Clark University, and **Adam P. Romero**, University of California, Los Angeles School of Law

- The first edited book to tackle LGBTQ divorce and relationship dissolution in an informed, comprehensive, and interdisciplinary matter
- Gathers and expands current knowledge on topics such as LGBTQ people's relationship and dissolution patterns
- Addresses practical issues such as mediation with same-sex couples who are separating or divorcing, financial planning, and family therapy for sexual minority parents and their children in the context of divorce/dissolution

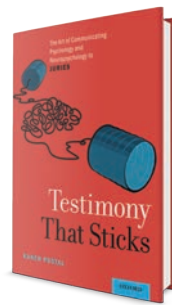

This book brings together social science and legal perspectives to examine the timely topic of relationship dissolution and divorce among sexual and gender minorities.

Testimony That Sticks

The Art of Communicating Psychology and Neuropsychology to Juries

Karen Postal, Harvard Medical School

- Interviews with over 70 forensic psychologists, neuropsychologists, attorneys, and judges
- Reveals what seasoned forensic experts actually say on the stand
- Offers concrete strategies to shed formal communication style, and make neuroscience accessible

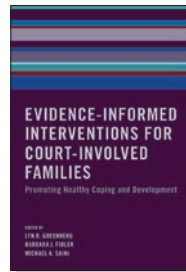

Testimony That Sticks shares the fruits of four years of in-depth interviews with over 70 forensic neuropsychologists and psychologists, as well as attorneys and judges, presenting what experts say on the stand: how they use compelling analogies, metaphors, and succinct explanations of assessment processes and findings, and principles of productive expert testimony for direct and cross examination.

Evidence-Informed Interventions for Court-Involved Families

Promoting Healthy Coping and Development

Edited by **Lyn R. Greenberg**, **Michael A. Saini**, University of Toronto, and **Barbara J. Fidler**

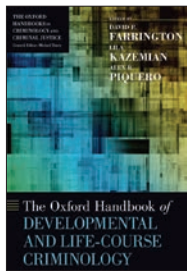

Children who experience parental divorce or trauma, particularly when these are accompanied by conflict, face increased risks to their health and adjustment. While many children adjust well, a sizeable number will experience long periods in which parents are in conflict or the family is involved with the courts. With chapters by an acclaimed international group of authors, this book provides the go to reference for understanding and providing appropriate services for these children and families, informed by the best available research and professional literature.

Cultural Constructions of Identity

Meta-Ethnography and Theory

Edited by **Luis Urrieta, Jr.**, The University of Texas at Austin, and **George W. Noblit**, The University of North Carolina at Chapel Hill

Cultural Constructions of Identity initiates the effort to allow for qualitative and ethnographic studies to speak to identity theory, collectively. Further, while the studies synthesized in this book look at various intersections of race and ethnicity with respect to gender, age, class, and sexuality, Urrieta and Noblit implore readers to consider what these studies reveal about identity and identification theory itself.

The Romantic Lives of Emerging Adults

Getting from I to We

Edited by **Varda Konstam**, University of Massachusetts, Boston

Emerging adults are taking a longer time to construct their identities, including commitment to partners, and they are doing so in the context of an unpredictable, shifting global economy with a paucity of guidelines to inform their choices. It articulates the tensions between opposing dynamics, the desire for a committed, trusting, long-term relationship, and the need to protect oneself and continue to grow as an individual in the event that such a relationship never materializes.

Let the Children Play

Why More Play Will Save Our Schools and Help Children Thrive

Pasi Sahlberg,
University of New South Wales, and
William Doyle,
University of Eastern Finland

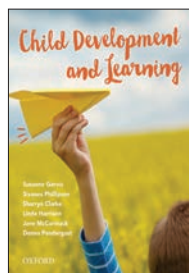

- Inspired by the successes found in Finland's education system, from one of Finland's leading education thinkers
- Authors, both fathers of school-age children, share their stories of switching countries — Sahlberg brought his Finnish family to the US, while Doyle brought his American family to Finland — and each was shocked at what they experienced on the other side
- Describes the fascinating community-driven and play-based learning experiments ongoing around the world, in rural China, Singapore, Scotland, and closer to home in Texas and Oklahoma

In *Let the Children Play*, Pasi Sahlberg and William Doyle make the research-informed case for helping schools and children thrive by giving more physical and intellectual play to all schoolchildren. Providing a vivid glimpse into the play-based experiments ongoing now all over the world, readers will find the book to be both a call for change and a guide for making that change happen in their own communities.

Adoption Beyond Borders

How International Adoption Benefits Children

Rebecca Compton,
Haverford College

This book provides a ringing endorsement of international adoption based on comprehensive evidence from social and biological sciences paired with the author's first-hand experience visiting a Kazakhstani orphanage for nearly a year. A balanced account of the evidence supports international adoption as a viable means of promoting child welfare.

9 Months In, 9 Months Out

A Scientist's Tale of Pregnancy and Parenthood

Vanessa LoBue,
Rutgers University

- Written specifically for new mothers, by a new mother who is also an infant development researcher
- Explores the science of month-to-month infant development alongside an honest account of how that science translates to a mother's experience
- Takes a researcher's lens to breastfeeding, the sleep training controversy, gender development, the science (or lack thereof) behind the link between vaccinations and autism, and the debate over screen time

Written in real time as LoBue proceeded through pregnancy and first-time parenthood, *9 Months In, 9 Months Out* explores the science of infant development alongside an honest account of how that science translates to a mother's experience.

NEW EDITION

Moral Development and Reality

Beyond the Theories of Kohlberg, Hoffman, and Haidt

FOURTH EDITION

John C. Gibbs,
The Ohio State University

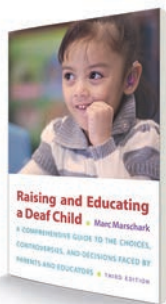

Moral Development and Reality explores the nature of moral development, human behavior, and social interconnections. This fourth edition is thoroughly updated, refined, and expanded. Complete with case studies and chapter questions, it serves as a text in advanced undergraduate and graduate courses in social/developmental psychology and human development.

UK: Apr 2019 / US: Apr 2019

NEW EDITION

Raising and Educating a Deaf Child

A Comprehensive Guide to the Choices, Controversies, and Decisions Faced by Parents and Educators

THIRD EDITION

Marc Marschark,

Rochester Institute of Technology

- A comprehensive guide for parenting or educating deaf children from birth through adulthood
- Provides clear evidence-based information on what we know and what we don't know about decisions that parents face
- Shares best practices for optimizing academic, social, and personal outcomes

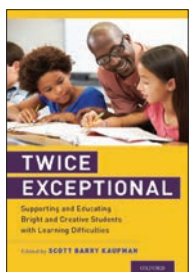

Now in its third edition, *Raising and Educating a Deaf Child* is a comprehensive, evidence-based guide to the choices, controversies, and decisions faced by parents and teachers of deaf children today.

UK: Jan 2018 / US: Nov 2017

Twice Exceptional

Supporting and Educating Bright and Creative Students with Learning Difficulties

Edited by **Scott Barry**

Kaufman, University of Pennsylvania

Twice Exceptional: Supporting and Educating Bright and Creative Students with Learning Difficulties provides

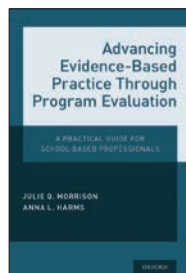

cutting-edge, evidence-based approaches to creating an environment where twice-exceptional students can thrive. Viewing the 2e student as neither exclusively disabled nor exclusively gifted, but, rather, as a dynamic interaction of both, leading experts offer holistic insight into identification, social-emotional development, advocacy, and support for 2e students.

The Child's Curriculum

Working with the Natural Values of Young Children

Edited by **Colwyn**

Trevarthen, University of Edinburgh, and **Jonathan**

Delafield-Butt, and **Aline-**

Wendy Dunlop, both at

University of Strathclyde

All children are born with emotional talent. If left untended, those talents can wane during the first five years of life. The book focusses on children's readiness for learning. It addresses the natural joy explicit in children's early conversations and engagement with music and their development through play with both adults and other children.

NEW EDITION

Learning to Trust

Attachment Theory and Classroom Management

SECOND EDITION

Marilyn Watson,

Developmental Studies Center, Oakland

The story of how one teacher, guided by attachment theory, creates a caring, learning community in her ungraded primary classroom. *Learning to Trust* chronicles the teacher's interactions as she guides her students to becoming good people and good learners. Student reflections seven years later reveal significant, positive long term effects on the students.

PERSPECTIVES ON DEAFNESS

Evidence-Based Practices in Deaf Education

Edited by **Harry Knoors**, Radboud University Nijmegen, and **Marc Marschark**, Rochester Institute of Technology

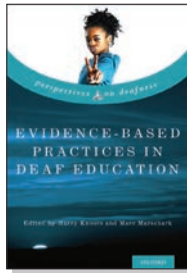

This volume presents the latest research from internationally recognized researchers and practitioners on language, literacy and numeracy, cognition, and social and emotional development of deaf learners. The volume addresses how we can improve outcomes of deaf education through professional development of teachers, the construction and implementation of evidence-based teaching practices, and consideration of "the whole child," thus emphasizing the importance of integrative, interdisciplinary approaches.

Deaf Education Beyond the Western World

Context, Challenges, and Prospects

Edited by **Harry Knoors**, Radboud University Nijmegen, **Maria Brons**, Kentalis International Foundation, and **Marc Marschark**, Rochester Institute of Technology

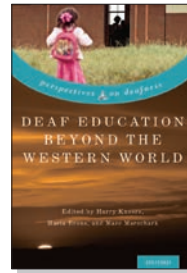

This volume encourages more researchers in more countries to continue investigating the learning environment of deaf learners, based on the premise of leaving no one behind. Featuring chapters centering on 19 countries, from Africa, Asia, Latin America, and Central and Eastern Europe, the volume offers a picture of deaf education from the perspectives of local scholars and teachers who demonstrate best practices and challenges within their respective regional contexts.

Theories of School Counseling Delivery for the 21st Century

Edited by **Colette T. Dollarhide**, The Ohio State University, and **Matthew E. Lemberger-Truelove**, University of New Mexico

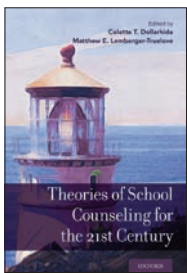

Theories of School Counseling

Delivery for the 21st Century provides a compilation of contemporary and cutting-edge theories to inform the way school counselors practice the art and science of school counseling. The text—written by theory experts—offers tremendous insight into each, thereby helping readers to (a) select a favorite theory, and (b) learn to incorporate theoretical flexibility in school counseling.

Introduction to School Psychology

Controversies and Current Practice

Edited by **Matthew K. Burns**, University of Missouri

- Provides a deeper understanding of current practice and facilitates critical thinking
- Traces historical and current controversies in the field
- Focuses on contexts and the future of school psychology with commentaries from early-career scholars

This book serves as an introduction to the field of school psychology. School psychology has evolved over the course of its existence due to several controversies, and how researchers and practitioners responded to those controversies. This text presents those debates and provides needed historical context to explain the field and facilitate deeper understanding in students.

An Intelligent Career

Taking Ownership of Your Work and Your Life

Michael B. Arthur,
Suffolk University,
Svetlana N. Khapova,
Vrije Universiteit
Amsterdam, and
Julia Richardson,
Curtin Business School
in Perth, Australia

- Serves as a playbook for the modern worker, by offering clear guidance and support on taking charge of opportunities, seeking continuous learning, collaborating with others, and determining when it is time to move on
- Will inspire workers across all industries, non-profit and for profit, in today's work world
- Presents an optimistic, forward-thinking vision of careers today and tomorrow

An Intelligent Career is a playbook for the modern knowledge worker, with clear guidance and support on taking charge of your own destiny, seeking continuous learning, collaborating with others, recognizing and acting on fresh opportunities, determining when it is time to move on, and much more.

Talent Without Borders

Global Talent Acquisition for Competitive Advantage

Robert E. Ployhart,
University of South Carolina,
Jeff A. Weekley, University
of Texas at Dallas, and
Julian Dalzell, University of
South Carolina

Talent Without Borders offers a practical approach to help managers think about acquiring talent globally. With explicit consideration of real-world issues that influence the implementation of global staffing solutions, the book shows managers how to use analytics and data to enable evidence-based decisions. Emphasizing national culture, strategy, and competitive advantage, it considers the entire talent life cycle, from attraction through retention.

The Surprising Science of Meetings

How You Can Lead your Team to Peak Performance

Steven G. Rogelberg,
University of North
Carolina at Charlotte

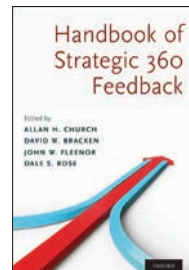

- Synthesizes the latest research from management and behavioral science to provide the best plan for managers who lead meetings
- Explains how to get the most out of meetings while reducing wasted time
- Makes the case that simple changes, such as tweaking the length of meetings, can have real impact

In *The Surprising Science of Meetings*, Steven G. Rogelberg draws from extensive research, analytics and data mining, and survey interviews to share the proven techniques that help managers and employees change the way they run meetings and upgrade the quality of their working hours.

The Psychoanalysis of Sense

Deleuze and the Lacanian School

Guillaume Collett,
University of Kent

The Psychoanalysis of Sense shows that Deleuze was not merely aware of the debates animating the Lacanian School during the 1960s: he sought to contribute to them. It offers a new, integrated reading of Deleuze's *The Logic of Sense* (1969) by understanding it as a 'psychoanalysis of sense'.

Belief

A Pragmatic Picture

Aaron Z. Zimmerman,
University of California,
Santa Barbara

Aaron Zimmerman presents a new pragmatist account of belief, in terms of information poised to guide our more attentive, controlled actions. And he explores the consequences of this account for our understanding of the relation between psychology and philosophy, the mind and brain, the nature of delusion, faith, pretence, racism, and more.

Knowing Emotions

Truthfulness and Recognition in Affective Experience

Rick Anthony Furtak,
Colorado College

In *Knowing Emotions*, Furtak argues that it is only through the emotions that we can perceive meaning in life, and only by feeling emotions that we are able to recognize the value or significance of anything whatsoever. Our affective responses and dispositions therefore play a critical role in human existence, and their felt quality is intimately related to the awareness they provide.

Regard for Reason in the Moral Mind

Joshua May,
University of Alabama

The burgeoning science of ethics has fostered pessimism about moral thought and action: we're told that they are driven by arbitrary factors and unreasoned feelings. Joshua May argues compellingly that this pessimism is not justified: moral judgment and motivation are fundamentally rational enterprises not beholden to the passions.

UK: May 2018 / US: Jun 2018

The Implicit Mind

Cognitive Architecture, the Self, and Ethics

Michael Brownstein,
John Jay College of Criminal
Justice, City University of
New York

The central contention of *The Implicit Mind* is that understanding the two faces of spontaneity—its virtues and vices—requires understanding the “implicit mind.” In turn, Michael Brownstein maintains that understanding the implicit mind requires the consideration of three sets of questions. First, what are implicit mental states? What kind of cognitive structure do they have? Second, how should we relate to our implicit attitudes? Are we responsible for them? Third, how can we improve the ethics of our implicit minds?

Self-Consciousness and “Split” Brains

The Minds' I

Elizabeth Schechter,
Washington University,
St Louis

Elizabeth Schechter explores the implications of the experience of people who have had the pathway between the two hemispheres of their brain severed, and argues that there are in fact two minds, subjects of experience, and intentional agents inside each split-brain human being: right and left. But each split-brain subject is still one of us.

What It Is Like To Perceive

Direct Realism and the Phenomenal Character of Perception

J. Christopher Maloney,
University of Arizona

Thought, including conscious perception, is representation. But perceptual representation is uniquely *direct*, permitting immediate *acquaintance* with the world and ensuring perception's distinctive *phenomenal character*. The perceptive mind is *extended*. It recruits the very objects perceived to constitute self-referential representations determinative of *what it is like* to perceive.

Freud's Mahabharata

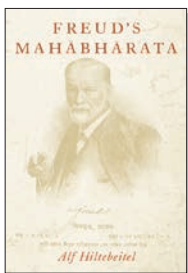

Alf Hiltebeitel, George Washington University

Though Freud never overtly refers to the *Mahabharata*, many of the Sanskrit epic's themes are illuminated by Freud's thought and, conversely, many incidents in the epic can be used to illustrate Freud's theories. In *Freud's Mahabharata*, Alf Hiltebeitel offers what he calls a "pointillist introduction" to a new theory about the *Mahabharata* based on Freud.

Representation in Cognitive Science

Nicholas Shea, University of London

How can we think about things in the outside world? There is still no widely accepted theory of how mental representations get their meaning. In light of pioneering research, Nicholas Shea develops a naturalistic account of the nature of mental representation with a firm focus on the subpersonal representations that pervade the cognitive sciences.

The First Minds

Caterpillars, Karyotes, and Consciousness

Arthur S. Reber, University of British Columbia

- The first effort to show that sentience begins with single-celled prokaryotes like bacteria
- Challenges the idea that consciousness is unique to humans
- Exposes old models full of philosophical, empirical, and evolutionary biological problems

The Cellular Basis of Consciousness theory places the first appearance of sentience at the emergence of life. It makes the radical, and previously unexplored, claim that prokaryotes, like bacteria, possess a primitive form of consciousness. The implications of the theory for the philosophy of mind, cell-biology, and cognitive neurosciences are explored.

INTERNATIONAL PERSPECTIVES IN PHILOSOPHY AND PSYCHIATRY

Thomas Szasz

An Appraisal of His Legacy

Edited by **C.V. Haldipur**, and **James L. Knoll IV**, both at SUNY Upstate Medical University, and **Eric v.d. Luft**, Gegensatz Press

- **Insanity Defence** - the book examines the concept and his criticism both from an historical and philosophical perspective
- **Concept of Mental illness** - questioning the concept of mental illness is central to much of Szasz's work. This book examines the concept in depth
- **Suicide** - the matter of suicide has been debated not only by physicians but also by legislators the world over. The book contributes to the debate by examining the issue from various perspectives

Thomas Szasz wrote over thirty books and several hundred articles, replete with mordant criticism of psychiatry. His works made him arguably one of the world's most recognized psychiatrists, albeit one of the most controversial. This book critically examines the legacy of a man who challenged the very concept of mental illness.

Madness and the Demand for Recognition

A Philosophical Inquiry into Identity and Mental Health Activism

Mohammed Abouelleil Rashed, University of London; King's College London

- The first comprehensive philosophical examination of the claims and demands of Mad activism
- Engages with a diverse set of disciplines and literatures: philosophy of psychiatry, Mad studies, Disability studies, activist literature, and philosophical literature on identity and recognition
- Develops a theoretical framework for identity and recognition that draws on Georg Hegel, Immanuel Kant, and the work of Charles Taylor, Axel Honneth, Nancy Fraser, Kwame Appiah, and Richard Rorty

Developments in mental health activism pose a radical challenge to psychiatric and societal understandings of madness. Mad Pride and mad-positive activism reject the language of mental 'illness' and 'disorder' and demand recognition of madness as grounds for identity. This book examines and responds to the claims and demands of Mad activism.

Surfing Uncertainty

Prediction, Action, and the Embodied Mind

Andy Clark, University of Edinburgh

- A comprehensive tour of emerging work on the predictive mind
- Presented rigorously, but without mathematical formalisms
- Pitched to cross disciplinary boundaries, exploring ideas at the intersection of neuroscience, philosophy, artificial intelligence, and psychology

Exciting new theories in neuroscience, psychology, and artificial intelligence are revealing minds like ours as *predictive minds*, forever trying to guess the incoming streams of sensory stimulation before they arrive. In this up-to-the-minute treatment, philosopher and cognitive scientist Andy Clark explores new ways of thinking about perception, action, and the embodied mind.

Brain-Mind

From Neurons to Consciousness and Creativity

Paul Thagard,
University of Waterloo

- Clearly written with no previous background in neuroscience or psychology needed
- Draws on exciting new ideas in theoretical neuroscience
- Explains the most challenging mental operations, right up to consciousness and creativity

Paul Thagard's *Brain-Mind* presents a unified, brain-based theory of cognition and emotion with applications to the most complex kinds of thinking, right up to consciousness and creativity. Neural mechanisms are used to explain mental operations for analogy, action, intention, language, and the self.

Natural Philosophy

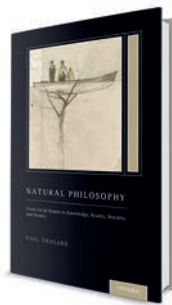

From Social Brains to Knowledge, Reality, Morality, and Beauty

Paul Thagard,
University of Waterloo

- Clearly written; no previous background in philosophy, neuroscience, or psychology needed
- Draws on exciting new ideas in theoretical neuroscience
- Comprehensive examination of epistemology, metaphysics, ethics, and aesthetics

Paul Thagard uses new accounts of brain mechanisms and social interactions to forge theories of mind, knowledge, reality, morality, justice, meaning, and the arts. *Natural Philosophy* brings new methods for analyzing concepts, understanding values, and achieving coherence. It shows how to unify the humanities with the cognitive and social sciences.

Mind-Society

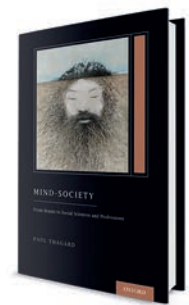

From Brains to Social Sciences and Professions

Paul Thagard,
University of Waterloo

- Clearly written; no previous background in neuroscience, psychology, or social science needed
- Draws on exciting new ideas in theoretical neuroscience
- Comprehensive application of brain mechanisms across the social sciences and professions

Paul Thagard systematically connects neural and psychological explanations of mind with major social sciences (social psychology, sociology, politics, economics, anthropology, and history) and professions (medicine, law, education, engineering, and business). Social change emerges from interacting social and mental mechanisms.

The Tao of Ordinarity

Humility and Simplicity in a Narcissistic Age

Robert J. Wicks, Loyola Maryland University

- Written in Wicks's trademark style, the book is short, engaging, and a pleasure to read despite its contrarian view
- Offers an argument in favor of humility and authenticity at a time when narcissism is rampant in politics, entertainment, and sports
- Includes a chapter on simplicity during a time when life seems so complex

The Tao of Ordinarity is an invitation to come home to your authentic self in a world now clearly mesmerized by "spin," narcissism, fantasy, and exhibitionism. The book offers an alternative to our pressures to measure our self-worth by numbers of likes and followers, living in a constant state of "FOMO" while we seek external validation for who we think we should be, instead of being comfortable with who we are.

EXPLORATIONS IN NARRATIVE PSYCHOLOGY

Entangled Narratives

Collaborative Storytelling and the Re-Imagining of Dementia

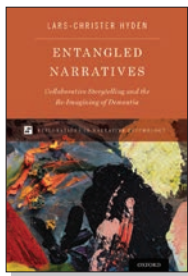

Lars-Christer Hyden,
Linköping University

In *Entangled Narratives*, Lars-Christer Hyden emphasizes the possibilities that are inherent in collaborative storytelling with individuals with dementia. He instructs professionals and otherwise healthy relatives to learn how to effectively listen and, ultimately, re-imagine their patients and loved ones as collaborative meaning-makers in their lives.

The Ethics of Storytelling

Narrative Hermeneutics, History, and the Possible

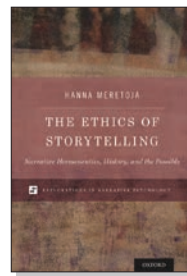

Hanna Meretoja,
University of Turku

Hanna Meretoja's *The Ethics of Storytelling: Narrative Hermeneutics, History, and the Possible* develops a nuanced framework for exploring the ethical complexity of the roles narratives play in our lives. Focusing on how narratives enlarge and diminish the spaces of possibilities in which we act, think, and re-imagine the world together with others, this book proposes a theoretical-analytical framework for engaging with both the ethical potential and risks of storytelling.

Beyond the Archive

Memory, Narrative, and the Autobiographical Process

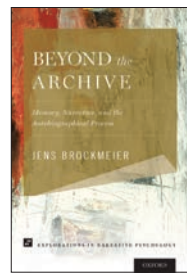

Jens Brockmeier, The American University of Paris

This book forces readers to radically rethink the idea of memory as an archive of the past. Examining the notion of remembering in the neurosciences, humanities, social studies, and in key works of autobiographical literature, these far-ranging studies shed new light on the narrative dynamic of remembering, forgetting, and identity.

The Psychological and Cultural Foundations of East Asian Cognition

Contradiction, Change, and Holism

Edited by

Julie Spencer-Rodgers,

California Polytechnic

State University, and **Kaiping Peng**,

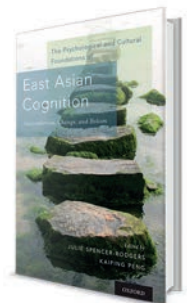

University of California at Berkeley

- Provides insight into understanding East-West differences in cognition, emotion, and behavior
- Sheds light on how Westerners (e.g. Americans, British, Australians, etc.) are similar in their basic cognitive processes
- Elucidates cultural differences that are pertinent to all of East Asia (and all of the West)

The Psychological and Cultural Foundations of East Asian Cognition is one of the most comprehensive volumes on East Asian cognition and thinking styles to date. This book is also one of the first to bring together a large body of empirical research on two of the most influential theories in culture psychology: naïve dialecticism and analytic/holistic thinking.

Renewing Democracy in Young America

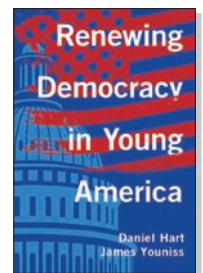

Daniel Hart, Rutgers University, and **James Youniss**, The Catholic University of America

In *Renewing Democracy in Young America*, Hart and Youniss explore the

idea that democracy depends on incorporating citizenship into long-term psychological identities. Proposing that 16- and 17-year-olds be able to vote in municipal elections and suggesting that schools create science-based, community-oriented environmental engagement programs, Hart and Youniss expound that by starting young and starting local, with direct citizen-participatory experiences, we can successfully create active and committed citizens.

Happier?

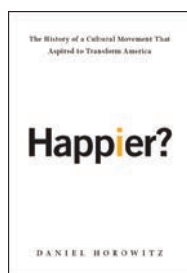

The History of a Cultural Movement That Aspired to Transform America

Daniel Horowitz,
Smith College

Happier? provides the first history of the origins, development, and impact of the shift in how Americans - and now many around the world - consider the human condition. Ultimately, the book illuminates how positive psychology, one of the most influential academic fields of the late twentieth and early twenty-first centuries, infused American culture with captivating promises for a happier society.

OXFORD LIBRARY OF PSYCHOLOGY

NEW EDITION

The Oxford Handbook of Personality and Social Psychology

SECOND EDITION

Edited by **Kay Deaux**, City University of New York Graduate Center, and **Mark Snyder**, University of Minnesota

- One of the only Handbooks devoted to building bridges between personality and social psychology
- Addresses the historical, conceptual, methodological, and empirical foundations between personality and social psychology

The second edition of this Handbook uniquely integrates personality and social psychology perspectives together in one volume. This new edition offers readers comprehensive coverage of new and emerging areas of theory, research, and application, and assesses the fields' growth and development since the publication of the first edition.

The Oxford Handbook of the Human Essence

Edited by **John F. Dovidio**, Yale University, and **Martijn van Zomeren**, University of Groningen

Advances in social-psychological theorizing and research suggest that humans can be viewed as biological beings as well as cultural creatures, rational reasoners as well as emotional enigmas, moral minds as well as amoral agents. Edited by Martijn van Zomeren and John F. Dovidio, *The Oxford Handbook of the Human Essence* expertly articulates both what social psychology can tell us about the human essence, and the astonishing range of perspectives reflected within this field.

PERSPECTIVES ON JUSTICE AND MORALITY

The Moral Punishment Instinct

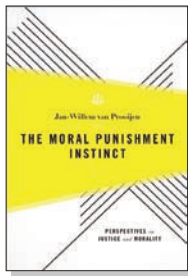

Jan-Willem van Prooijen,
VU University Amsterdam

Why do we universally punish offenders? This book proposes that people possess a moral punish instinct: a hard-wired tendency to aggress against those who violate the norms of their group. This instinct is reflected in how punishment originates from moral emotions, stimulates cooperation, and shapes the social life of human beings.

Perspectives on Justice and Morality

Honor Bound

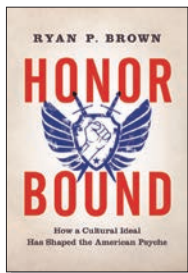

How a Cultural Ideal Has Shaped the American Psyche

Ryan P. Brown, Rice University

In *Honor Bound*, social psychologist Ryan Brown tells the story of how a specific cultural narrative, the ideology of honor, continues to shape the psyche of people around the world, including the southern and western United States. Throughout this book, Brown reveals the powerful, surprising, and sometimes paradoxical dynamics of honor through personal stories, contemporary events, and scientific research.

Supernatural

Death, Meaning, and the Power of the Invisible World

Clay Routledge, North Dakota State University

- Reveals fascinating research pointing to the fact that as people abandon conventional faiths, they become more interested in other supernatural and paranormal ideas
- Argues against the mainstream belief that people are becoming wholly more rational and scientific
- While most pollsters argue religiosity is declining, Routledge urges readers to look more broadly at the data on people's attraction to the supernatural

Clay Routledge, an experimental social psychologist who grew up in a deeply religious environment, argues that belief or trust in forces beyond our understanding is natural and rooted in our fears of death. In *Supernatural: Death, Meaning, and the Power of the Invisible World*, Routledge argues that supernatural thinking is adaptive, even healthy, and that it should unite and not divide us.

Strength Through Peace

How Demilitarization Led to Peace and Happiness in Costa Rica, and What the Rest of the World can Learn From a Tiny, Tropical Nation

Judith Eve Lipton and **David P. Barash**, Professor Emeritus, University of Washington

Costa Rica is the only fully demilitarized, completely independent country in the world. Through good luck, good leadership, and good decisions, Costa Rica has become arguably the sanest and most progressive country on earth. This book examines how and why Costa Rica is safe and independent without any military at all, and what the rest of us can learn from its success.

The Creativity Reader

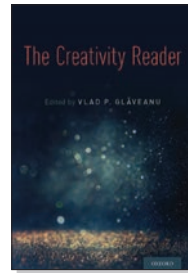

Edited by **Vlad Petre Glaveanu**, Webster University

The Creativity Reader brings together a prestigious group of international experts who were tasked with choosing, introducing, and commenting on seminal texts focused on creativity, invention, genius, and imagination from the period of 1850 to 1950. This volume is at once retrospective and prospective: it revisits old ideas, assesses their importance today, and explores their potential for the future.

NEW EDITION

Advanced Social Psychology

The State of the Science

SECOND EDITION

Edited by **Eli J. Finkel**, Northwestern University, and **Roy F. Baumeister**, Florida State University

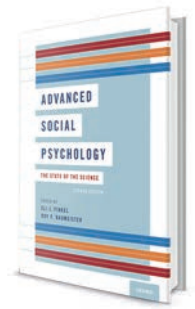

- Addresses issues surrounding replicability in all domains and research areas of social psychology
- Includes new chapters on morality, judgment and decision making, and computational social psychology

This volume provides a graduate-level introduction to social psychology. The authors are world-renowned leaders on their topic, and they have written state-of-the-art overviews of the discipline's major research domains. The chapters convey the joy, excitement, and promise of scientific investigations into human sociality.

A Scientific Search for Altruism

Do We Only Care About Ourselves?

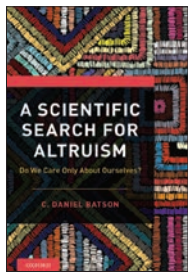

C. **Daniel Batson**, University of Kansas

This book traces the scientific search for altruism through numerous studies and attempts to examine various motivational suspects, reaching the improbable conclusion that empathy-induced altruism is indeed part of our nature. The book then considers the implications of this conclusion both for our understanding of who we are as humans (the bad news as well as the good) and for how we might create a more humane society.

One Nation, Two Realities

Dueling Facts in American Democracy

Morgan Marietta, University of Massachusetts Lowell, and **David C. Barker**, American University

Americans no longer agree on basic questions of fact. Marietta and Barker reach a number of enlightening and provocative conclusions: dueling fact perceptions are not so much a product of hyper-partisanship or media propaganda as they are of simple value differences and deepening distrust of authorities.

NEW EDITION

The Handbook of Culture and Psychology

SECOND EDITION

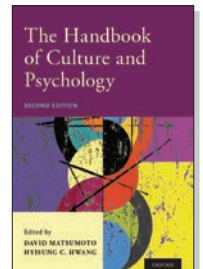

Edited by **David Matsumoto**, San Francisco State University, and **Hyisung C. Hwang**, Humintell

This book describes the continued evolution and advancement of cultural and cross-cultural psychology. Renowned authors review the state-of-the-art in well-studied areas such as development, cognition, emotion, personality, psychopathology, psychotherapy, and acculturation, as well as emerging areas such as multicultural identities, cultural neuroscience, and religion. The book is a must read for all culturally informed scholars.

The Marvel of Martyrdom

The Power of Self-Sacrifice in a Selfish World

Sophia Moskalenko, University of Maryland, and **Clark McCauley**, Bryn Mawr College

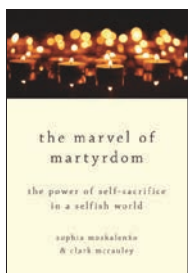

The Marvel of Martyrdom starts large — with famous and influential martyrs such as Jesus and Gandhi — and ends small — with ordinary people whose own experiences of self-sacrifice give martyrdom its political power. Seeking the everyday rewards of self-sacrifice, the book shows the potential for finding meaning and happiness in helping others.

The Three Pillars of Radicalization

Needs, Narratives, and Networks

Arie W. Kruglanski, University of Maryland, **Jocelyn J. Bélanger**, New York University in Abu Dhabi, and **Rohan Gunaratna**, Nanyang Technology University

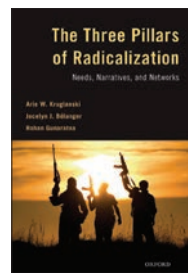

Arie W. Kruglanski, Jocelyn J. Bélanger, and Rohan Gunaratna present a new model of radicalization that takes into account factors that activate the individual's quest for significance. Synthesizing varied empirical evidence, this volume reinterprets prior theories of radicalization and examines major issues in deradicalization and recidivism, which will only become more relevant as communities continue to negotiate the threat of extremism.

Out in Time

The Public Lives of Gay Men from Stonewall to the Queer Generation

Perry N. Halkitis, Rutgers University

- Documents the personal histories of gay men who came out across three modern time periods, showcasing how radically distinct social and political contexts changed the coming out experience
- Identifies the unifying threads tying gay men who were baby boomers together with those of generation X and the millennial generation
- Considers how the lives of gay men have improved over the last 50 years and yet how some challenges continue to burden gay men's lives to this day

Out in Time explores the life experiences of three generations of gay men — the Stonewall, AIDS, and Queer generations — arguing that while there are generational differences in the lived experiences of young gay men, and each one confronts its own unique historical events, realities, and socio-political conditions, there are consistencies across time that define and unify the identities of gay men.

Superstition

A Very Short Introduction

Stuart Vyse, Independent scholar, psychologist, and author

Do you touch wood for luck, or avoid the number 13? Despite the dominance of science in today's world, superstitious beliefs - both traditional and new - remain surprisingly popular. From black cats to lucky pennies, Stuart Vyse explores the history of our deepest superstitions, and the psychological reasons behind why they persist today.

Darwin's Roadmap to the Curriculum

Evolutionary Studies in Higher Education

Edited by **David Sloan Wilson**, Binghamton University, **Glenn Geher**, State University of New York at New Paltz, **Hadassah Mativetsky**, Universal Instruments, and **Andrew Gallup**, SUNY Polytechnic Institute

This volume serves to integrate the vast literature in the interdisciplinary field of Evolutionary Studies (EvoS), providing clear examples of how evolutionary concepts relate to all facets of life. Exploring controversies surrounding evolution education, this volume provides a roadmap to asking and answering Darwinian questions across all areas of intellectual inquiry.

UK: Jul 2019 / US: May 2019

Statistics in Context

Barbara Blatchley,
 Agnes Scott College

Statistics in Context offers a fresh approach to teaching statistics. Designed to reduce students' fear of numbers, the text aims to put statistics-wary readers at ease with uncomplicated explanations and practical examples drawn from real research and everyday life. Written in lively, accessible prose, the narrative describes the who, what, when, where, and why, and also the how, of statistics.

The Philosophy of Quantitative Methods

Understanding Statistics

Brian D. Haig,
 University of Canterbury

The Philosophy of Quantitative Methods undertakes a philosophical examination of a number of important quantitative research methods within the behavioral sciences in order to overcome the non-critical approaches typically provided by textbooks. These research methods are exploratory data analysis, statistical significance testing, Bayesian confirmation theory and statistics, meta-analysis, and exploratory factor analysis.

OXFORD JOURNALS

academic.oup.com/journals

Music Therapy Perspectives

Music Therapy Perspectives, an official publication of the American Music Therapy Association, is for readers inside and outside the profession of music therapy. *Music Therapy Perspectives* seeks to promote the development of music therapy clinical practice through the dissemination of scholarly work. Focusing on clinical benefits of music therapy, the journal strives to serve as a resource and forum for music therapists, music therapy students and educators, and those in related professions.

Journal of Music Therapy

Journal of Music Therapy, an official publication of the American Music Therapy Association, is a forum for authoritative articles of current music therapy research and theory, including book reviews and guest editorials. Its mission is to promote scholarly activity in music therapy and to foster the development and understanding of music therapy and music-based interventions. The journal strives to present a variety of research approaches and topics, to promote critical inquiry, and to serve as a resource and forum for researchers, educators, and clinicians in music therapy and related professions.

Archives of Clinical Neuropsychology

Archives of Clinical Neuropsychology, the official journal of the National Academy of Neuropsychology, publishes original contributions dealing with psychological aspects of the etiology, diagnosis, and treatment of disorders arising out of dysfunction of the central nervous system.

Journal of Pediatric Psychology

The *Journal of Pediatric Psychology* is the scientific publication of the Society of Pediatric Psychology (SPP), Division 54 of the American Psychological Association. The journal publishes articles related to theory, research, and professional practice in pediatric psychology.

Schizophrenia Bulletin

Schizophrenia Bulletin seeks to review recent developments and empirically based hypotheses regarding the etiology and treatment of schizophrenia. We view the field as broad and deep, and will publish new knowledge ranging from the molecular basis to social and cultural factors.

Social Work

Social Work is the premier journal of the social work profession. Widely read by practitioners, faculty, and students, it is the official journal of National Association of Social Work and is provided to all members as a membership benefit. *Social Work* is dedicated to improving practice and advancing knowledge in social work and social welfare.

Social Work Research

Social Work Research publishes exemplary research to advance the development of knowledge and inform social work practice. The journal includes analytic reviews of research, theoretical articles pertaining to social work research, evaluation studies, and diverse research studies that contribute to knowledge about social work issues and problems.

Health & Social Work

For 20 years, human services professionals have relied on *Health & Social Work* for the latest advances in areas such as aging, clinical work, long-term care, oncology, substance abuse, depression, and maternal health. Articles also cover research, policy, specialized services, quality assurance, in-service training, and other topics that affect the delivery of health care services.

Children & Schools

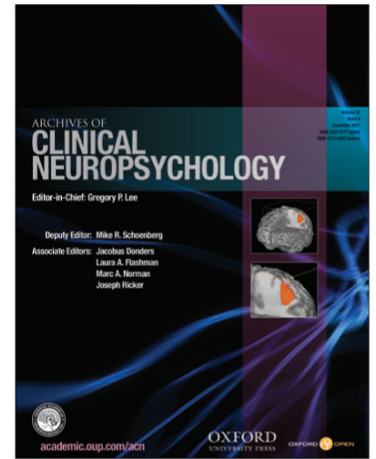

Children & Schools publishes professional materials relevant to social work services for children. The journal publishes articles on innovations in practice, interdisciplinary efforts, research, program evaluation, policy, and planning. Topics include student-authority relationships, multiculturalism, early intervention, needs assessment, violence, and ADHD. *Children & Schools* is a practitioner-to-practitioner resource.
