How Voting Scores Are Calculated

All voting scores are calculated using this formula:

- Each vote for a bill that VCDL "Strongly Supports" adds 2 to the pro-rights score
- Each vote for a bill that VCDL "Supports" adds 1 to the pro-rights score
- Each vote for a bill that VCDL "Strongly Opposes" adds 2 to the anti-rights score
- Each vote for a bill that VCDL "Opposes" adds 1 to the anti-rights score
- Votes on bills where VCDL is neutral are not counted

Each gun bill that is introduced is scored as a vote for the patron of the bill, accordingly, if the bill is not withdrawn before its first vote.

Each gun bill that is introduced on VCDL's behalf is scored as another positive vote, accordingly, for the bills' patron if the bill is not withdrawn before its first vote.

Each bill in the House that is "Pocket Vetoed" and is not assigned to a committee is scored accordingly, but reversed, for the Speaker of the House. For example, pocket vetoing a "Strongly Supports" bill will add 2 to the Speaker's anti-rights score, while pocket vetoing a "Strongly Opposes" bill will add 2 to the Speaker's pro-rights score.

Each bill in the House that is "Pocket Vetoed" and is assigned to a committee is scored accordingly, but reversed, for the Committee Chair(s) and the Speaker of the House. For example, pocket vetoing a "Strongly Supports" bill will add 2 to the anti-rights score of the Committee Chair(s) and the Speaker, while pocket vetoing a "Strongly Opposes" bill will add 2 to the pro-rights score of the Committee Chair(s) and the Speaker.

Each pro-rights bill in the House that gets an up or down Floor vote is scored accordingly and as a positive for the Speaker.

Each anti-rights bill in the House that does not get an up or down Floor vote is scored accordingly as a positive for the Speaker.

Each pro-rights bill in the House that does not get an up or down Floor vote is scored accordingly as a negative for the Speaker.

Each anti-rights bill in the House that gets an up or down Floor vote is scored accordingly as a negative for the Speaker.

If a pro-rights bill is modified in a negative manner by the Governor and those modifications are ruled "non-germain" by the Speaker of the House, that is scored accordingly as a pro-rights vote for the Speaker.

Scoring example: A legislator introduces a "Strongly Support" bill for VCDL, votes for it in subcommittee, full committee, and on the Floor. His score for that bill would be 10: 2 for introducing a pro-rights bill + 2 for introducing a bill on VCDL's behalf + 2 for the subcommittee vote + 2 for the full committee vote + 2 for the Floor vote.

All committee and subcommittee votes are counted, but only the last Floor vote in each chamber is counted.

If two legislators have the same pro-rights percentage, then the legislator with the most pro-rights points determines which legislator has the better voting record. For example, if two legislators have 100% voting records, with one having 38 pro-rights points and the other 10 points, the one with 38 points has the better voting record.

Note: Legislators that are on certain key committees, like the House Militia, Police, and Public Safety, will have many more votes to score than someone who is not on that committee and can only vote on gun bills when they are on the Floor. In fact some legislators may not get to vote on a bill at all if the bill is pocket vetoed or never reaches either a full committee or the Floor.

How to Read the Vote Breakdown For Legislators

Voting records also include the breakdown of all gun-bill votes for each legislator.

Each bill has the bill number, followed by one or more votes with the points for each vote. Positive points are a pro-rights vote and negative points are an anti-rights vote.

If the legislator introduced a pro-rights bill, that is flagged as a “P” (for patron), followed by a colon and the points for introducing that bill.

If the legislator introduced a bill at the request of VCDL, then they get a “P:4” score. “P” for patron and 4 = (2 for introducing a strongly supported bill + 2 for introducing a bill on VCDL’s behalf). (Note that “P” scores can also appear as adjustments to the voting record of the Speaker and the Committee Chair(s) for pocket vetoes and to the voting record of the Speaker for votes getting to the Floor.)

In each chamber the votes on a bill are numbered from 1 to n, from the first vote in a subcommittee or committee to the last vote on the Floor (if the bill gets that far). The votes continue to be counted each time the bill returns to the Floor for either a veto override or for reconciliation of changes made by the other chamber. Votes are shown by a “V” followed by the vote number in parentheses, a colon, and the vote count. The first vote listed could be V(3), for example, if the legislator’s first vote on a bill was on the Floor. **NOTE: Unanimous votes are not counted and are treated as if they never existed.**

Examples:

If a legislator patroned a bill for VCDL and voted for it on the Floor, his breakdown might look like this:

HB999, P:4, V(3): 2

If the legislator voted for a gun bill that was a VCDL “strongly support” in subcommittee, committee, and the Floor, it might look like this:

HB 9998, V(1):2, V(2):2, V(3):2

Each of the above breakdowns is worth 6 pro-rights points.
